Subject Re: Avenal - options papers and other background

Not sure who has responsibility to set up call. OGC meeting internally at 12 noon our time, and Brian will raise it. Do you want Abi to call Bob P's office to try to arrange?

I had initially thought of Mark Jacobson anyway; we have worked with him and I think he is clearly a good choice.

I'm not as familiar with Prof. Fung's work, but I looked at her background and research interests and I imagine she would be a fine selection.

I mainly wanted the Bay Area to have representation among award winners. This is achieved if we have a Stanford or Berkeley person being recognized for climate science, as I saw in the other email. So I don't have a strong preference for Richmond for the green gov category.

Also, I don't need to be involved at all in who is participating in panels but just want to remind everyone that I was told to tell our sponsor air pollution executive officers that they would play some role in the day's events - either as presenters or moderators - and I did so verbally.

Does J want him substituted for wahleah? He had earlier mentioned manuel as moderator. Assume he wants the others mentioned in the previous emails substituted. Wendy is set to make calls this am. If there are any other categories J wants to change please let me know asap so I can alert wendy. The one I still have a question mark for is green gov. We were attempting to create a tie in to bay area with City of richmond. Deb would know best how critical this is. Thx.

If it is specific to climate change and not necessarily air quality, I would go with Inez Fung. Inez has made a tremendous contribution to the state of climate change science. Inez doesn't work on air quality issues so if the award ties climate change to air quality impacts then I would go with Jacobson.

I didn't see the context but Inez Fung is truly amazing. She is a climate modeler by training but has been part of the climate change political landscape since the early days. Inez is in the class of scientists with Stephen Schneider, although she is not nearly as outspoken as he was. She is a great public speaker, if that's what this is related to.

Subject: Re: draft schedule for your comments

Here is a draft including an agenda, the start of a script and incorporating Julies schedule. I have to defer totally to Julie on this at this point. I've been pulled off on GHG Guidance tasks all afternoon and this is the best I can do, without reviewing Julies proposed schedule.

Julie, can you pick this up and add anything and distribute it to the full group for review and comment? I need to do a Hill briefing on the GHG guidance right now.

Also, have you talked to Stephanie. Do we need to include here in this meeting. Jeff said he would only bring Lashon if Stephanie is coming?

*(See attached file: Avenal agenda and script.docx)*

Julie Walters---11/09/2010 02:38:07 PM---This draft is very similar to the schedule we gave the Court for making a final determination on Ave

Date: 11/09/2010 02:38 PM  
Subject: draft schedule for your comments

---

This draft is very similar to the schedule we gave the Court for making a final determination on Avenal's permit based on the need to consider and take public comment on Avenal's NO2 information, but adds in an extra 4 weeks for EPA to develop a GHG BACT analysis on the front end and extra 4 weeks to respond to GHG BACT-related comments on the back end. Since this would likely be the first GHG BACT analysis done by EPA, I can't see that we'd have much wiggle room to complete this further. The schedule is 175 days from the day that Avenal gets us approvable NO2 submittal and GHG BACT analyses.

Janet,

Here are the talking points on the NO2 modeling for tomorrow's call with Avenal. Region 9 modeling and legal folks have reviewed and Steve has seen these as well. Debbie is in Phoenix and has not seen this yet, but once you're ok with these, do you want to send to Jared? Let me know if you have any questions.

Thanks,

Chet

**Subject:** Ahnold is in town

Hey Jared,

Just got this invite to a green jobs event with Arnold next Wed at Levi's. Thought you might want to check it out. They are going to send you an invite also.

I was at City Hall yesterday, Newsom was cleaning out his office. Strange days!

We should grab lunch.

Brian

----- Forwarded message -----

**From:** Justin Sternberg <(b) (6)>  
**Date:** Wed, Nov 10, 2010 at 1:57 PM  
**Subject:** Fwd: SF Clean Energy Jobs Event  
**To:** Brian Purchia <(b) (6)>

Hello Brian,

Hope you are well. My business partner, Michael Barber, helped facilitate this \$250k donation to lighting efficiency job training. I thought you might be interested in attending the media event with Tom Steyer and the Governor, here in SF. I'll be there.

Also, the company I cofounded, [Continuum Industries](#), is about to close on our first contract: a large-scale outdoor lighting efficiency redesign for the DoD. I am getting ready to move to Alaska in January for at least a couple months, possibly longer.

Best, Justin

(b) (6)

--

Barber, Sternberg,

Please pass this along to any media reps/reporters you know that may be interested. Can be

anyone. I think it's going to turn out to be a big deal.

Sternberg, you're welcome to attend to if you'd like.

All the best,

Zack

Policy, jobs and the environment are themes that capture a wide range of readers. At 10:00am on November 17, these three themes will come together in a summit of private and political collaboration. Political leaders, union and non-union business leaders, utility representatives will assemble at Levi's Global Headquarters in San Francisco to unveil a new program to create clean energy jobs.

- 50+ jobs will be created on the spot

- \$250,000 will be donated to develop the program

The chain of events will begin with a summary of policy from the political representatives. Then the grant, benefiting the job-training program, will be unveiled and the training program detailed. The culmination of this will be a number of electrical contractors committing to hiring the graduates of the program.

- California Governor **Arnold Schwarzenegger** and **Tom Steyer** will represent the political leaders.

- **Bernie Kotlier** will represent the jobs training program

- **Bill Musgrave** and **Nick Dutto**, among others, will represent contractors and hire the graduates during the event

- Representatives from Southern California Edison and other utilities

All the speakers will be available for one on one interviews following the initial program. Please let me know if you have any questions or would like additional information.

To schedule an interview, please contact:

Zack Watson

### **MEDIA ALERT – ATTN: ASSIGNMENT DESK**

***2,500+ Green-Collar Jobs to Be Created as a Result Private and Political Collaboration***

**Governor Arnold Schwarzenegger Confirms Attendance**

**Tom Steyer, pledges \$250,000 to Green-Collar Job Training Program**

**WHAT:** On the heels of an intense political battle over California's landmark Global Warming Solutions Act, Tom Steyer, has pledged a quarter of a million dollars to create a green collar job training program.

Electrical contractors have committed to hiring the first 50+ graduates of the program and will make this

announcement at the event.

The donation will benefit The California Advanced Lighting Controls Training Program (CALCTP), a collaboration of statewide utilities, UC Davis, the community college system, and electrical labor and management unions.

CALCTP trains electricians, both union and non-union, in energy efficiency. The statewide program certifies graduates in the design and installation of advanced lighting controls: the most cost effective reduction in electricity consumption.

The gift itself will be used to create an energy efficiency sales training program and support curriculum development. The sales training program will educate enrollees about retrofitting existing real estate space, navigating the utility and state incentives, and putting the whole process together.

**All speakers will be available for brief one on one interviews, contact Zachary Watson to schedule.**

**WHEN:** Wednesday, November 17<sup>th</sup>, 2010

**WHERE:** *CALCTP Energy Efficiency Retrofit Site*  
*Levi's Global Headquarters*  
1155 Battery St.  
San Francisco, CA 94111

**INTERVIEW:** Arnold Schwarzenegger, California Governor  
Thomas Steyer, No on 23 co-chair  
Bernie Kotler, CALCTP co-chair  
Bill Musgrave, president McMillan Electric  
Nick Dutto, president Metropolitan Electric  
Statewide utility representatives

Subject Invitation -- U.S. EPA 40th Anniversary Awards Event , Dec.  
2 at Union Station, Los Angeles

## CELEBRATING 40 YEARS OF ENVIRONMENTALISM

December 2, 2010

10:00 a.m. to 3:00 p.m.

(Doors open at 9:15 a.m.)

*Panel Discussion, Luncheon & Awards Ceremony*

Historic Union Station

800 North Alameda Street, Los Angeles, CA 90012

Please join us in celebrating "40 Years of Environmentalism" in the Environmental Protection Agency's Pacific Southwest Region. We invite you to be a part of our anniversary celebration to honor past, current and future environmental stewards. For four decades, EPA and its partners have fought for cleaner air, water and land for all Americans. To reflect on these triumphs and our future call to action, we will host panel discussions, lunch and an awards ceremony to recognize outstanding environmental leaders in the Pacific Southwest.

**RSVP by November 26, 2010, by replying to this email**

**Because of limited seating capacity, we will let you know if your attendance is confirmed.**

### **OUR PARTNERS:**

South Coast Air Quality Management District

Bay Area Air Quality Management District

San Joaquin Valley Air Pollution Control District

Subject: FW: Help Us Sell Out Again

Hi Jared,

You may have seen an invitation to CEH's event this Monday at the Yerba Buena Center in San Francisco. There are two parts of the event: the reception and the program. Last week, it was sold out, because we had too many people for the room where the program was scheduled. But today we confirmed moving the program to a larger room, so I can now harass folks who I really want to attend. That means you!

Details below. I hope that you can make it.

**Subject:** Help Us Sell Out Again

As you've likely heard, the Center for Environmental Health is throwing a party next Monday, December 6 from 6 pm until 9 pm. In fact, it's at the Lexington Law Group where Annie Leonard – today's most brilliant environmental film maker – will screen her latest, eight-minute masterpiece. [Buy your tickets now.](#)

At first, we worried that we might not fill the theatre (after all, this is our first large-scale, big-time, luminary-heavy event).

Now, it seems those worries were unnecessary because, to quote Sally Fields, you like us. And some of you who have sponsored the event are the Lexington Law Group, the Teamsters, and Kaiser Permanente).

The theatre we were going to use for the screening is too small for the growing throng of CEH supporters who'd like to attend.

So what do you do when too many people want to attend your party?

Well at CEH, we knock down a wall so that we don't have to turn away the wonderful supporters responsible for our fourteen-year record of victories.

**So now we've got 50 tickets left to sell.**

[Buy yours now. Really. Right now.](#) (They'll be long gone by Monday, and we'd hate for you to miss the screening and the fun of this inspiring event.)

[Please join us on Monday to celebrate the First \(Almost\) Lead Free Holiday Season.](#) As a CEH supporter, this monumental public health victory is yours.

Subject draft final klamath TMDL press release

We still need: the facts on pollution reduced and this fact checked.

Happy New Year's!

#### Klamath TMDL Press Release JEB 1.pages

##### EPA Approves Historic Salmon Restoration Plan for Klamath River

Action culminates 13 years of state and federal efforts to develop pollution limits for 17 North Coast water bodies SAN FRANCISCO -- (Date TBD ) – The U.S. Environmental Protection Agency has approved California's water quality improvement plan for restoring salmon fisheries and water quality in the Klamath River.

The Klamath River, a federally protected "Wild and Scenic River," flows 263 miles southwest from Oregon through northern California, and empties into the Pacific Ocean. The Klamath river drains into an extensive watershed covering over 15,000 square miles.

The Klamath River and its tributaries support the highest diversity of anadromous fishes of any river in California including coho salmon, chum salmon, Chinook salmon, coastal cutthroat trout, steelhead, sturgeon and Pacific lamprey. Upstream, the Oregon Klamath hosts the state's most robust population of redband trout, as well as bull trout, and several species of suckers. Over 430 wildlife species, including 263 bird species, have been observed in the Klamath watershed. The Klamath Basin represents the largest freshwater wetlands west of the Mississippi River and has been called the "Everglades of the West."

Many of the tribes that live and fish along the Klamath River have relied on the salmon run for more than 7,000 years. These tribes include the Yurok, Hoopa, Karuk, Quartz Valley and Resighini Rancheria on the lower river (California), and the Modoc, Klamath and Yahooskin in the upper basin (Oregon).

Under the Clean Water Act, states and authorized tribes are required to develop a list of waters that do not meet water quality standards (section 303(d)). The water bodies on this list are called "impaired." For these impaired waters, jurisdictions must calculate the maximum amount of a particular pollutant allowed to enter a waterbody so that it can meet water quality standards into the future. These pollution limits are called Total Daily Maximum Loads or TMDLs.

Today, the Klamath River, from source to mouth, is listed as water quality "impaired" under the Clean Water Act. Starting in 1992, the California State Water Quality Control Board (California Water Board) proposed that the Klamath River be listed for both temperature and nutrients, requiring the development of TMDL limits and implementation plans, (US EPA) accepted this action in 1993. The basis for listing the Klamath River as impaired is aquatic habitat degradation due to organic enrichment/low dissolved oxygen, excessively warm water temperatures and algae blooms associated with high nutrient loads, water impoundments, and agricultural diversions. Microcystin toxins, released by toxic algae, pose significant health risks. Microcystin toxins are known to cause harmful results ranging from skin rashes and fevers to livestock poisoning and liver toxicity. Since 2004, sampling of microcystin toxins at several locations on the lower Klamath have exceeded World Health Organization standards.

In 2008, the California Water Board stated that conditions on the Klamath River indicate an ongoing "decline in the river's water quality and ability to support healthy fisheries." Several water bodies in the Klamath Basin - the Trinity River, Scott River, the Lost River, and the Klamath Straits Drain are also impaired due to too much pollution.

"This historic Klamath River plan paves the way to restoring one of our nation's largest, most scenic and biologically important watersheds," said Jared Blumenfeld, Regional Administrator for the US EPA. "By establishing clear benchmarks and accountability this plan will ensure that Klamath River can thrive long into the future," added Blumenfeld.

This plan reflects a multi-year collaborative effort to develop pollutant limits for the full Klamath River. A

partnership between EPA, California's Regional Board and the Oregon Department of Environmental Quality officially began in 2003. California's plan went through extensive public review and was approved by both the Regional Board and State Water Resources Control Board prior to EPA's approval. The companion plan for the upper reaches of Klamath River in Oregon was released by Oregon DEQ on December 21, 2010; EPA's Pacific Northwest region is expected to act on Oregon's plan in January 2011.

"The Klamath particularly is a troubled river system, and once supported the third largest salmon runs in the nation. Implementation of these Klamath Mainstem TMDLs will go a long way toward helping restore those key salmon runs, and the jobs those salmon once supported," said Glen Spain, of the Pacific Coast Federation of Fishermen's Associations.

"It is truly good news that the current round of water quality planning for the Klamath River is complete," said Catherine Kuhlman, Executive Officer of the North Coast Regional Board. "Now, it's time for action to reduce water pollution and restore the river in order to enhance the myriad of beneficial uses of the river."

The State's plan identifies actions to improve water quality to restore salmon and other fisheries in the River, Native American cultural uses and enhance general recreational uses of the Klamath River. Oregon's Department of Environmental Quality, the Regional Board, U.S. EPA and many other partners are developing a watershed-wide tracking program to increase the pace and reduce the cost of improving Klamath Basin water quality to support all water-related uses in the Basin. The plan also addresses water quality impacts of the Klamath Hydroelectric Project, establishes a policy to protect thermal refuges (cooler areas in the river that provide critical habitat for fish during high temperatures), and addresses nonpoint sources of pollution such as roads and agriculture.

This action is the culmination of 13 years of state and federal efforts to develop TMDLs for 17 North Coast water bodies. The Klamath River in California is the last of those water bodies in the North Coast covered by a 1997 legal settlement under which EPA and/or the State was to develop TMDLs.

Subject Re: Fw: draft final Klamath TMDL press release

Hi Mary & Sue - Some minor edits on Sue's version of the press release are attached.

KlamathTMDLapprovalpressrelease.d010311v2.doc

In addition to closing the loop with Glen Spain, we should also check in with Cat Kuhlman once we have the "final" version.

Thanks and happy new year,

~ Gail

Hi Mary,

I made a few edits / corrections. Yahooskins are not mentioned by ODEQ as part of their Klamath TMDLs (upper River or Upper basin and UKL) so I deleted them.

Gail- any other things you see needing adjustment?

Hope this helps.

#### EPA Approves Historic Salmon Restoration Plan for Klamath River

Action culminates 13 years of state and federal efforts to develop pollution limits for 17 North Coast water bodies

SAN FRANCISCO -- (Date TBD ) – The U.S. Environmental Protection Agency has approved California's water quality improvement plan for restoring salmon fisheries and water quality in the Klamath River.

The Klamath River, a federally protected "Wild and Scenic River," flows 263 miles southwest from Oregon through northern California, and empties into the Pacific Ocean. The Klamath river drains into an extensive watershed covering over 15,000 square miles.

The Klamath River and its tributaries support the highest diversity of anadromous fishes of any river in California including coho salmon, chum salmon, Chinook salmon, coastal cutthroat trout, steelhead, sturgeon and Pacific lamprey. Upstream, the Oregon Klamath hosts the state's most robust population of redband trout, as well as bull trout, and several species of suckers. Over 430 wildlife species, including 263 bird species, have been observed in the Klamath watershed. The Klamath Basin represents the largest freshwater wetlands west of the Mississippi River and has been called the "Everglades of the West."

Many of the tribes that live and fish along the Klamath River have relied on the salmon run for more than 7,000 years. These tribes include the Yurok, Hoopa, Karuk, Quartz Valley and Resighini Rancheria on the lower river (California), and the Modoc, Klamath and Yahooskin in the upper basin (Oregon).

Under the Clean Water Act, states and authorized tribes are required to develop a list of waters that do not meet

water quality standards (section 303(d)). The water bodies on this list are called “impaired.” For these impaired waters, jurisdictions must calculate the maximum amount of a particular pollutant allowed to enter a waterbody so that it can meet water quality standards into the future. These pollution limits are called Total Daily Maximum Loads or TMDLs.

Today, the Klamath River, from source to mouth, is listed as water quality “impaired” under the Clean Water Act. Starting in 1992, the California State Water Quality Control Board (California Water Board) proposed that the Klamath River be listed for both temperature and nutrients, requiring the development of TMDL limits and implementation plans, (US EPA) accepted this action in 1993. The basis for listing the Klamath River as impaired is aquatic habitat degradation due to organic enrichment/low dissolved oxygen, excessively warm water temperatures and algae blooms associated with high nutrient loads, water impoundments, and agricultural diversions. Microcystin toxins, released by toxic algae, pose significant health risks. Microcystin toxins are known to cause harmful results ranging from skin rashes and fevers to livestock poisoning and liver toxicity. Since 2004, sampling of microcystin toxins at several locations on the lower Klamath have exceeded World Health Organization standards.

In 2008, the California Water Board stated that conditions on the Klamath River indicate an ongoing “decline in the river’s water quality and ability to support healthy fisheries.” Several water bodies in the Klamath Basin - the Trinity River, Scott River, the Lost River, and the Klamath Straits Drain are also impaired due to too much pollution.

“This historic Klamath River plan paves the way to restoring one of our nation’s largest, most scenic and biologically important watersheds,” said Jared Blumenfeld, Regional Administrator for the US EPA. “By establishing clear benchmarks and accountability this plan will ensure that Klamath River can thrive long into the future,” added Blumenfeld.

This plan reflects a multi-year collaborative effort to develop pollutant limits for the full Klamath River. A partnership between EPA, California’s Regional Board and the Oregon Department of Environmental Quality officially began in 2003. California’s plan went through extensive public review and was approved by both the Regional Board and State Water Resources Control Board prior to EPA’s approval. The companion plan for the upper reaches of Klamath River in Oregon was released by Oregon DEQ on December 21, 2010; EPA’s Pacific Northwest region is expected to act on Oregon’s plan in January 2011.

“The Klamath particularly is a troubled river system, and once supported the third largest salmon runs in the nation. Implementation of these Klamath Mainstem TMDLs will go a long way toward helping restore those key salmon runs, and the jobs those salmon once supported,” said Glen Spain, of the Pacific Coast Federation of Fishermen’s Associations.

“It is truly good news that the current round of water quality planning for the Klamath River is complete,” said Catherine Kuhlman, Executive Officer of the North Coast Regional Board. “Now, it’s time for action to reduce water pollution and restore the river in order to enhance the myriad of beneficial uses of the river.”

The State’s plan identifies actions to improve water quality to restore salmon and other fisheries in the River, Native American cultural uses and enhance general recreational uses of the Klamath River. Oregon’s Department of Environmental Quality, the Regional Board, U.S. EPA and many other partners are developing a watershed-wide tracking program to increase the pace and reduce the cost of improving Klamath Basin water quality to support all water-related uses in the Basin. The plan also addresses water quality impacts of the Klamath Hydroelectric Project, establishes a policy to protect thermal refuges (cooler areas in the river that provide critical habitat for fish during high temperatures), and addresses nonpoint sources of pollution such as roads and agriculture.

This action is the culmination of 13 years of state and federal efforts to develop TMDLs for 17 North Coast water bodies. The Klamath River in California is the last of those water bodies in the North Coast covered by a 1997 legal settlement under which EPA and/or the State was to develop TMDLs.

**Subject:** Re: Via Daphne

These are long complicated questions that I'm afraid I don't have time to answer. If you want to do it in the phone that might be possible, but writing the answers will take a lot more time than I can give it.

On Mon, Jan 10, 2011 at 4:42 PM, <[Blumenfeld.Jared@epamail.epa.gov](mailto:Blumenfeld.Jared@epamail.epa.gov)> wrote:

Michael:

Great to meet you too. As mentioned, I think the folks in Hawaii could benefit greatly from meeting with you so let me know if you are ever heading out that way. Also, I am planning a number of small EPA tours of conventional and sustainable farming in the central valley and you could join if you are interested.

Finally, at my pushing EPA now has a newsletter. The next edition will be on food! It would be fantastic if you could provide 200 words. I am also talking to Guy Fieri, Nell Newman and Paula Deen.

Here are the questions:

If you could change one thing about the way food was produced what would it be?

Do you have to be rich to have a healthy diet?

Can we produce enough food to feed the world without harming the environment?

What is your least favorite food packaging?

In 40 years from now how will food be different?

Thanks,

Hi, Mr. Pollan,

Jared forwarded your email to me. We're pleased to share with you that Marion Nestle and Nell Newman have also expressed interest in answering the questionnaire, so I will also contact them to find a matching date and time for the phone call.

Would Jan 28 @ 2:00 pm work for you, or can you suggest a few dates and times, and I will share the proposed dates/times with Ms. Nestle and Ms. Newman.

Best,

Nelly

These are long complicated questions that I'm afraid I don't have time to answer. If you want to do it in the phone that might be possible, but writing the answers will take a lot

more time than I can give it.

On Mon, Jan 10, 2011 at 4:42 PM, <[Blumenfeld.Jared@epamail.epa.gov](mailto:Blumenfeld.Jared@epamail.epa.gov)> wrote:  
Michael:

Great to meet you too. As mentioned, I think the folks in Hawaii could benefit greatly from meeting with you so let me know if you are ever heading out that way. Also, I am planning a number of small EPA tours of conventional and sustainable farming in the central valley and you could join if you are interested.

Finally, at my pushing EPA now has a newsletter. The next edition will be on food! It would be fantastic if you could provide 200 words. I am also talking to Guy Fieri, Nell Newman and Paula Deen.

Here are the questions:

If you could change one thing about the way food was produced what would it be?

Do you have to be rich to have a healthy diet?

Can we produce enough food to feed the world without harming the environment?

What is your least favorite food packaging?

In 40 years from now how will food be different?

Thanks,

Dear Jared,

I have a lot of free time this semester and would be interested in interning at your office again. I looked online to see which internships are offered by the EPA but couldnt find any in San Francisco I would love to work at your office and was wondering who i should contact to apply for an internship there.

Best Regards

Thanks so much for contacting EPA! We have actually just been talking a great deal about volunteer opportunities, so your inquiry is well-timed. If you would please email me some additional information (resume and brief description of the experience you're looking for), I'll put you in touch with the appropriate manager here at the Agency, and we can go from there!

Subject Here's y facebook chatter with Margot from LA Times. Read and laugh.. then work out what I can write back!! Today!

So are you going to join the bike ride on Tuesday!!!?

i'm having a hard time coming up with a newsy reason to give my editors for going. your ideas welcome!

That you can actually bike in LA? That low-tech solutions to air pollution are often ignored. That there are a lot more folks biking than anyone gives credit. That there will soon be a new bike plan. You will get to hang out with Mitch Katz the new health czar for LA?

it betrays your SF prejudices that you think it is news to Angelenos that you can bike in LA. Lots of people bike here and we've written lots of biking stories. As u must know we had a huge cyclavia event only recently. Plus there was a huge uproar here when a motorist deliberately bumped two cyclists in mandeville canyon. if you are telling us something about the new bike plan--like EPA thinks it should be changed, toughened or whatever, then that is news perhaps. But just that there will be a plan? i think that's known already. As for Mitch, the health reporters are all over him. Not trying to be negative here. I would be delighted if we could come up with some newsworthy reason for going....I'm off for my regular sat ayem hike right now, but you can email me more at [margot.roosevelt@latimes.com](mailto:margot.roosevelt@latimes.com) and will read when i return!

Subject Fw: Biomass enforcement case press release quote

Jared, as I remember you approved the press release (attached), with the exception of your quote. This was the draft quote (written by the Air Div):

“EPA supports clean, renewable energy and understands the important role that biomass plants play by providing an alternative to agricultural burning,” said Jared Blumenfeld, EPA’s Regional Administrator for the Pacific Southwest region. “However, the San Joaquin Valley has some of the worst air quality in the nation. EPA, together with our state and local partners, will enforce against any facility that violates the law and further pollutes the air we breathe.”

I suggested a new second sentence, which you may have seen....

“EPA supports clean, renewable energy and understands the important role that biomass plants play by providing an alternative to agricultural burning,” said Jared Blumenfeld, EPA’s Regional Administrator for the Pacific Southwest region. “To ensure these plants aren't contributing to the San Joaquin Valley's already poor air quality, EPA and our our state partners will take enforcement action against any facility that violates the law.”

Subject Re: Luis Bocangel Volunteer Internship Request

I would like to intern and the department of the environment because it is respective job in a professional environment where I can pursue my passion for helping with the environment to use. I enjoy working with people and would like to help promote environmentally friendly alternatives as well as contribute my time to help with current projects. I am interested in the fields of green building, laws and regulations, as well as restoration of nature.

## Experience

### **La Petite Baleen April 2009 to Present**

- Working hands on teaching a variety of different age groups from babies to adolescents how to swim. At La Petite Baleen I how to deal with children and their parents and co-operate to create a fun and safe learning environment.

### **Vector Marketing June 2008 to April 2009**

- Working at Vector I have gained advanced training in sales, great communication and time management skills.

### **Department of The Environment April 2008 to Present.**

- Working in the green building department I have learned how to organize contacts and other data on computer spread sheets, I got a nice feel for how the department worked but would have liked to be more involved in the ongoing projects themselves

### **Cain Images March 2008 till April 2008**

- Helped Mr. Doug Cain set up computer network in his office by running cables throughout hallways and rooms and putting them up on the walls.

## Education

### **School of The Arts High School 2005 to 2009**

I graduated from SOTA's vocal program. This program has gave me many great traveling opportunities for example we traveled to New York and performed at Carnegie Hall, but more importantly its taught me to work as a team with my other choir members in order to produce a wonderful sound.

### **San Francisco State University**

**2009 to**

### **Present**

I am currently a sophomore majoring in International Relations. My love for people and traveling made it easy inspired me to pursue a career as a diplomat and help under represented countries.

## Skills

I am a very responsible and reliable individual. Always make sure I bring an excellent attitude to work. I am tech savvy and fluent in Spanish however I would say my strongest skill is my people skills since I am very polite and outgoing.

Dear Jared,

I have a lot of free time this semester and would be interested in interning at your office again. I looked online to see which internships are offered by the EPA but couldnt find any in San Francisco I

would love to work at your office and was wondering who i should contact to apply for an internship there.

Best Regards

Luis

Subject: Re: Luis Bocangel Volunteer Internship Request

---

I would like to intern and the department of the environment because it is respective job in a professional environment where I can pursue my passion for helping with the environment to use. I enjoy working with people and would like to help promote environmentally friendly alternatives as well as contribute my time to help with current projects. I am interested in the fields of green building, laws and regulations, as well as restoration of nature.

## Experience

### **La Petite Baleen April 2009 to Present**

- Working hands on teaching a variety of different age groups from babies to adolescents how to swim. At La Petite Baleen I how to deal with children and their parents and co-operate to create a fun and safe learning environment.

### **Vector Marketing June 2008 to April 2009**

- Working at Vector I have gained advanced training in sales, great communication and time management skills.

### **Department of The Environment April 2008 to Present.**

- Working in the green building department I have learned how to organize contacts and other data on computer spread sheets, I got a nice feel for how the department worked but would have liked to be more involved in the ongoing projects themselves

#### **Cain Images March 2008 till April 2008**

- Helped Mr. Doug Cain set up computer network in his office by running cables throughout hallways and rooms and putting them up on the walls.

## **Education**

#### **School of The Arts High School 2005 to 2009**

I graduated from SOTA's vocal program. This program has gave me many great traveling opportunities for example we traveled to New York and performed at Carnegie Hall, but more importantly its taught me to work as a team with my other choir members in order to produce a wonderful sound.

#### **San Francisco State University**

**2009**

#### **to Present**

I am currently a sophomore majoring in International Relations. My love for people and traveling made it easy inspired me to pursue a career as a diplomat and help under represented countries.

## **Skills**

I am a very responsible and reliable individual. Always make sure I bring an excellent attitude to work. I am tech savvy and fluent in Spanish however I would say my strongest skill is my people skills since I am very polite and outgoing.

Dear friends of Greenaction and environmental justice,

I am writing to ask you to join the First Annual Walkathon for Environmental Justice on Sunday, May 1st in Golden Gate Park.

The Walkathon will start at 11 a.m. at the Stanyan/Height Street entrance to Golden Gate Park.

- \* We will walk, run or bike all the way to the Pacific Ocean.
- \* Participants who raise at least \$50 in pledges will get a free Greenaction t-shirt.
- \* If you cannot directly participate in the event, you can sponsor one of our walkers

We will send out registration and sponsorship information in a few days, but I am sending this email now to ask please participate so we can reach our goal of 100 walkers.

Greenaction is organizing this event to raise awareness and funds to support our many campaigns for environmental justice and healthy communities in the Bay Area, Kettleman City and across the country.

As an organization that speaks out and doesn't compromise or sell-out, we depend on our friends and supporters to raise the funds necessary to keep fighting polluters and their friends in government.

PLEASE EMAIL ME BACK ASAP TO LET US KNOW IF YOU CAN WALK OR SPONSOR A WALKER IN THE  
FIRST ANNUAL WALKATHON FOR ENVIRONMENTAL JUSTICE.

Thanks!!!!

The State's EJ analysis is found in the following document created by the CEC:

CEC-800-2009-006-CMF\_Y.PDF

It begins at page 337/434 ("page 328" of document).

My understanding is that Air and CED staff reviewed it in 2009 but that we did not submit comments to the State.

I would like to intern and the department of the environment because it is respective job in a professional environment where I can pursue my passion for helping with the environment to use. I enjoy working with people and would like to help promote environmentally friendly alternatives as well as contribute my time to help with current projects. I am interested in the fields of green building, laws and regulations, as well as restoration of nature.

## **Experience**

### **La Petite Baleen April 2009 to Present**

- Working hands on teaching a variety of different age groups from babies to adolescents how to swim. At La Petite Baleen I how to deal with children and their parents and co-operate to create a fun and safe learning environment.

### **Vector Marketing June 2008 to April 2009**

- Working at Vector I have gained advanced training in sales, great communication and time management skills.

### **Department of The Environment April 2008 to Present.**

- Working in the green building department I have learned how to organize contacts and other data on computer spread sheets, I got a nice feel for how the department worked but would have liked to be more involved in the ongoing projects themselves

### **Cain Images March 2008 till April 2008**

- Helped Mr. Doug Cain set up computer network in his office by running cables throughout hallways and rooms and putting them up on the walls.

## **Education**

### **School of The Arts High School 2005 to 2009**

I graduated from SOTA's vocal program. This program has gave me many great traveling opportunities for example we traveled to New York and performed at Carnegie Hall, but more importantly its taught me to work as a team with my other choir members in order to produce a wonderful sound.

**San Francisco State University**

**2009**

**to Present**

I am currently a sophomore majoring in International Relations. My love for people and traveling made it easy inspired me to pursue a career as a diplomat and help under represented countries.

**Skills**

I am a very responsible and reliable individual. Always make sure I bring an excellent attitude to work. I am tech savvy and fluent in Spanish however I would say my strongest skill is my people skills since I am very polite and outgoing.

Dear Jared,

I have a lot of free time this semester and would be interested in interning at your office again. I looked online to see which internships are offered by the EPA but couldnt find any in San Francisco I would love to work at your office and was wondering who i should contact to apply for an internship there.

Best Regards

Luis

Laura, I would be interested in a paid internship at the U.S EPA if there is one available since my goal is to eventually work for the EPA.

Thanks,

Luis

To: Laura Mayo/R9/USEPA/US@EPA  
Date: 01/31/2011 09:31 PM  
Subject: Re: Luis Bocangel Volunteer Internship Request

I would like to intern in the department of the environment because it is a respective job in a professional environment where I can pursue my passion for helping with the environment to use. I enjoy working with people and would like to help promote environmentally friendly alternatives as well as contribute my time to help with current projects. I am interested in the fields of green building, laws and regulations, as well as restoration of nature.

## **Experience**

### **La Petite Baleen April 2009 to Present**

- Working hands on teaching a variety of different age groups from babies to adolescents how to swim. At La Petite Baleen I how to deal with children and their parents and co-operate to create a fun and safe learning environment.

### **Vector Marketing June 2008 to April 2009**

- Working at Vector I have gained advanced training in sales, great communication and time management skills.

### **Department of The Environment April 2008 to Present.**

- Working in the green building department I have learned how to organize contacts and other data on computer spread sheets, I got a nice feel for how the department worked but would have liked to be more involved in the ongoing projects themselves

### **Cain Images March 2008 till April 2008**

- Helped Mr. Doug Cain set up computer network in his office by running cables throughout hallways and rooms and putting them up on the walls.

## **Education**

### **School of The Arts High School 2005 to 2009**

I graduated from SOTA's vocal program. This program has gave me many great traveling opportunities for example we traveled to New York and performed at Carnegie Hall, but more importantly its taught me to work as a team with my other choir members in order to produce a wonderful sound.

### **San Francisco State University**

**2009**

#### **to Present**

I am currently a sophomore majoring in International Relations. My love for people and traveling made it easy inspired me to pursue a career as a diplomat and help under represented countries.

## **Skills**

I am a very responsible and reliable individual. Always make sure I bring an excellent attitude to work. I am tech savvy and fluent in Spanish however I would say my strongest skill is my people skills since I am very polite and outgoing.

Dear Jared,

I have a lot of free time this semester and would be interested in interning at your office again. I looked online to see which internships are offered by the EPA but couldn't find any in San Francisco. I would love to work at your office and was wondering who I should contact to apply for an internship there.

Best Regards

Luis

**FOR IMMEDIATE RELEASE**

March 8, 2011

## EPA Updates Database on Health and Environmental Impacts of Electricity Generation

### User friendly web tool allows Americans to search for power providers by zip code

**WASHINGTON --** The U.S. Environmental Protection Agency updated its database that helps Americans understand the health and environmental impacts of electricity generation. EPA's Emissions and Generation Integrated Resource Database (eGRID) and Power Profiler now include data from 2007, an update from 2005.

eGRID is a comprehensive database of emissions from almost all electric power generated in the United States. The data are widely used to show the impacts of electricity generation as well as the benefits from reduced electricity demand. eGRID contains emissions information for nitrogen oxides (NO<sub>x</sub>) and sulfur dioxide (SO<sub>2</sub>) which contribute to unhealthy air quality and acid rain in many parts of the country. eGRID also contains emissions information for carbon dioxide (CO<sub>2</sub>), methane (CH<sub>4</sub>), and nitrous oxide (N<sub>2</sub>O), which are greenhouse gases that contribute to climate change.

Power Profiler is a user friendly online application that uses eGRID data to show air emissions information and the type of electricity generation, such as coal or nuclear, in various regions of the country. By simply entering a zip code and selecting a utility, users can learn more about where their electricity comes from and what impact it has on air quality and the environment.

More information about eGRID: <http://www.epa.gov/egrid>

More information about Power Profiler: <http://www.epa.gov/powerprofiler>

**FOR IMMEDIATE RELEASE**

March 10, 2011

## **U.S. Commerce Department Announces Launch of i6 Green Challenge to Promote Clean Energy Innovation and Economic Growth**

*U.S. departments of Agriculture, Commerce and Energy, along  
with the Environmental Protection Agency and the National  
Science Foundation, support entrepreneurship initiative*

**WASHINGTON** – The U.S. Commerce Department's Economic Development Administration (EDA) and its Office of Innovation and Entrepreneurship today announced the opening of its \$12 million i6 Green

Challenge in partnership with the U.S. departments of Agriculture and Energy, the U.S. Environmental Protection Agency, the National Science Foundation, and Commerce's National Institute of Standards and Technology and U.S. Patent and Trademark Office.

EDA will award up to \$1 million to each of six teams around the country with the most innovative ideas to drive technology commercialization and entrepreneurship in support of a green innovation economy, increased U.S. competitiveness and new jobs. Its partner agencies will award more than \$6 million in additional funding to i6 Green winners.

"Initiatives like the i6 Green Challenge support the president's vision for out-innovating the rest of the world by moving great ideas from the lab to the marketplace to spur the development of 21<sup>st</sup> century jobs and industries," U.S. Commerce Secretary Gary Locke said. "We know that in the last 30 years, nearly all net new jobs were created by startups, and they will continue to play a critical role in our nation's economic prosperity."

First announced at the White House launch of [Startup America](#) in January, i6 Green follows last year's inaugural i6 Challenge to accelerate high-growth entrepreneurship in the United States.

"The \$12 million i6 Green Challenge is an important component of President Obama's Startup America initiative to promote American innovation and win the future," said U.S. Chief Technology Officer Aneesh Chopra. "The multi-agency competition builds on the success of last year's initiative by encouraging Proof of Concept Centers and promoting green growth to increase our nation's competitiveness and accelerate the economic recovery."

This year's competition focuses on promoting Proof of Concept Centers, which supports all aspects of the entrepreneurship process, from assisting with technology feasibility and business plan development, to providing access to early-stage capital and mentors to offer critical guidance to innovators. Centers allow emerging technologies to mature and demonstrate their market potential, making them more attractive to investors and helping entrepreneurs turn their idea or technology into a business.

"The i6 Green Challenge will help catalyze American ingenuity by leveraging the proven benefits that these centers offer to promote green growth, advance cluster development and strengthen the economic ecosystems of America's regions," U.S. Assistant Secretary of Commerce for Economic Development John Fernandez said.

"The history of environmental protection has been a history of innovation, with new tools and technology that make everything we do cleaner and greener. American small business and startups have always been at the heart of our innovative capacity and continue to lead the way in America's world-leading environmental technology industry," said EPA Administrator Lisa P. Jackson. "We're proud to be working with our federal government partners to support new ideas and new products to grow our economy at the same time we clean up our environment."

EPA joined the i6 Challenge this year to support the development of technology geared toward protecting human health and the environment. EPA funding will be targeted to technology that has a high priority in those areas such as improving energy efficiency in water treatment, renewable energy from wastewater sludge and animal waste, and recycling of e-waste. Funding will also broadly support actions to commercialize environmental technologies.

The Federal Funding Opportunity notice and application information on i6 Green is available at <http://www.eda.gov/i6>. The deadline to submit an application is May 26, 2011. Funding is contingent upon Congressional approval of the administration's 2011 budget.

Hello, Lisa

Please see the attached email correspondence (EPA Emails and SFDPH Emails), obtained through a public records request, and a draft coalition report. The email correspondence from Mark Ripperda, Reg. 9 Remedial Project Manager for the Hunters Point Naval Shipyard Superfund Site, show that he is conspiring with employees and consultants of the Lennar Corporation to conceal asbestos exposures and create false reports to the public. As you may recall from the comments that Bayview Hunters Point residents made during the Green for All public forum in San Francisco last year, the Lennar Corp. is planning a major redevelopment of the shipyard. These emails are damning.

I want to give you advance notice that a coalition my organization is working with will be holding a press conference on these emails in San Francisco at 3 pm EST. You may receive press calls.

Please call me at 504.919.4590.

Respectfully,  
Monique

Sign up to volunteer for April 10: [sundaystreetssf.com/volunteer](http://sundaystreetssf.com/volunteer)

---

### Lead a Bike Train on Bike to School Day

We are looking for volunteers across the city who can lead "bike trains" on Bike to School Day, Thursday, April 7. Bike Trains are simply groups of parents and kids that meet up at a set location and bike together to

school. Make your commute more fun by organizing your bike train today, go to [sfbiketoschoolday.org](http://sfbiketoschoolday.org) or email [rose@sfbike.org](mailto:rose@sfbike.org) to sign up! And a very big thank you to the volunteers who together stuffed a record 3,000 Bike to School Day bags last week!

Be sure to join in the festivities and ride with thousands of students and parents on [Bike to School Day on April 7th!](#)

### **Show Your Love for New Bike Lanes**

The SF Bicycle Coalition is proud to be working with the City to get new bike lanes on the ground, [linking neighborhoods across San Francisco](#) and creating safer connections for the record numbers of people who are already biking. As we celebrate improvements like the separated lanes on [Laguna Honda Boulevard](#) and [Division Street](#), we need you to email your Supervisor and the SFMTA and let them know how these bike lanes make a difference. Do the bike lanes on North Point make getting to work by bike more comfortable? Is dropping your kids off at school safer with the Kirkham Street bike lanes? [Click here](#) to find out how to quickly express your thanks and let the city know that bike lanes make a difference to you.

### **Lessons from Amsterdam: How SF Can Bicycle Toward Greatness**

Join David Chiu, President of the SF Board of Supervisors, and Leah Shahum, Executive Director of the SF Bicycle Coalition, as they share lessons from their recent trips to Amsterdam, a great city with an inspiring bicycling environment. As record numbers of people are biking here, how can we learn from the Netherlands' relatively recent successes to help us connect our city through great bikeways and safe streets that help more people of all ages to move around by bicycle? Find out more as these city leaders share their ideas on how we can make San Francisco an easier place to shop, live and play and meet the city's goal of 20% of trips by bicycle by 2020.

*5:30-7:30pm, Thu., Mar. 31, Main Library Koret Auditorium, 100 Larkin St. FREE. Complimentary valet bike parking on Grove St. Co-sponsored by the SF Bicycle Coalition and the Consulate General of the Netherlands*

### **Last Day to Recruit a Friend and Win Great Prizes**

Today is the very last day for you to grab a friend to become a member of the SF Bicycle Coalition, and win great prizes while you are at it! You get entered into the raffle for each friend you recruit for great prizes like a custom Rickshaw Bagworks Zero Bag, and your friend saves \$5 on a one-year membership. It is win-win! Simply go to [sfbike.org/get-a-member](http://sfbike.org/get-a-member), where you can send an email or get your unique referral code to post on Facebook, Twitter, or even your blog.

And of course, more members means more people helping to make your ride even more safe, comfortable and convenient. And, drum roll please...the person who recruits the most friends to join the SF Bicycle Coalition will ride away on a sexy Dutch bike, courtesy of [My Dutch Bike](#). So [get a member](#) now!.

### **Celebrate Bike to Work Day as a Volunteer**

Bike to Work Day is the biggest bike event of the year and YOU make it happen. Last year, over 300 amazing volunteers helped make [Bike to Work Day](#) a roaring success, and volunteers like you will make 2011 the biggest

celebration yet. Thursday, May 12th is the day you can have fun helping energize commuters at one of our 25 neighborhood Energizer Stations or parking bikes at our evening Bike From Work Party. Sign up today at [sfbike.org/vol\\_sign\\_up\\_btwd](http://sfbike.org/vol_sign_up_btwd)

**Be a Bicycle Ambassador at your workplace.** Request your free Bike to Work Day Employer Toolkit for your workplace, complete with an official event poster, employer resources and more at [sfbike.org/employertoolkit](http://sfbike.org/employertoolkit).

**Nominate a Bike Commuter of the Year.** The Bike Commuter of the Year Award honors a resident from each Bay Area county who makes every day a "Bike to Work Day". This person epitomizes and actualizes the health, environmental, social, and economic benefits of bicycling. Nominate someone you admire by April 14 at [youcanbikethere.com/bcoy](http://youcanbikethere.com/bcoy).

## **A Few Hours and a Change for the Better**

It's Time for *Tube Times* and we have two ways you can be part of getting the Spring issue out on the street!

1. Come to the *Tube Times* Folding Party tomorrow night (*Wed., Mar. 23*) from 5-8pm at the *San Francisco Bicycle Coalition, 833 Market St. 10th Floor*. Our office will be hopping with friendly folks -- chatting, snacking, and folding away until the folding is done. Dinner is provided. Bring your bike up to the 10th floor. Questions? Email [tessa@sfbike.org](mailto:tessa@sfbike.org) or just show up to volunteer.
2. Mail by bike! If you've got a bike trailer or have a few hours this Friday, Mar. 25th to ride with the SF Bicycle Coalition trailer to the post office [email Tessa](mailto:tessa@sfbike.org)

**Daytime Data:** Join our invaluable team of amazing data entry volunteers who help us enter important info. A few hours a week makes a world of difference. [Email Tessa](mailto:tessa@sfbike.org) to sign up or for more information.

**Community Hubs Outreach** The SF Bicycle Coalition and the YBIKE program are partnering to host family bicycle and pedestrian safety training at Community Hubs. If you're outreach trained and would like to be a part of these family fun events [email Tessa](mailto:tessa@sfbike.org).

## **Sunday Streets Fans Play in the Streets**

Amazing volunteers help make the year's first Sunday Streets a Success! Thanks to hundreds of volunteers who helped open the Embarcadero for people to enjoy walking, skating and bicycling at the first [Sunday Streets](#) event of 2011! And next month, on Sunday April 10th, take part in the second Sunday Streets from Golden Gate Park to the Great Highway ( [read coverage of last Sunday's event on Streetsblog](#) ).

**Volunteer for the next Sunday Streets:** For each of the Sunday Streets events, including April 10, the SF Bicycle Coalition is proud to partner with Livable City by recruiting and training more than two hundred volunteers. All volunteers get a Sunday Streets t-shirt, a lunch, and the great feeling that you helped make Sunday Streets possible. There is a special treat for people who volunteer for five or more events! Do you want to be a part of the Sunday Streets team that helps make it happen? Sign up to volunteer now at [sundaystreetsf.com/volunteer](http://sundaystreetsf.com/volunteer)!

## Ride for the SF Bicycle Coalition on this Year's Climate Ride

We're thrilled that the San Francisco Bicycle Coalition was just named a full beneficiary of Climate Ride's 2011 charity bicycling events! The Climate Ride is a 5-day 300-mile ride of stunning coastline, towering redwoods, and picturesque wine country, finishing in San Francisco in October. Last year was the first year the Climate Ride came to the West Coast, and we've heard nothing but great stories about this fully supported bike tour. Now, we need YOU to make it a great ride. When you sign up to ride the Climate Ride, designate the San Francisco Bicycle Coalition as your charity and you'll be helping to raise money that will support our work to make streets safer. Don't miss this opportunity to meet inspiring people, learn about the latest climate science, enjoy some of the most scenic biking in the country and improve your commute. Learn more and register at [climateride.org](http://climateride.org).

## Video: Connecting Our City with Crosstown Bikeways

Record numbers of people are bicycling in San Francisco. More San Franciscans want to bike, and we all know how to make that possible: connecting the city with separated bikeways that let people just like you get anywhere in the city and beyond. Please take a minute to share our sweet video about a Richmond District family who wants to bike more -- [share the video with with three people](#), and together we can build critical support to connect our city with 100 miles of crosstown bikeways. With 12,000 members joining together to share this video and spread the word, we can keep this powerful momentum rolling ahead.

1. [Email it](#) to a friend, your co-worker or your neighbor
2. Share it:
3. Tweet it:

## Upcoming Events

[Check out our online calendar of events](#). To add your bike event to our calendar, simply email the details to [calendar@sfbike.org](mailto:calendar@sfbike.org)

**\*\* Tuesday, March 22nd \*\***

### Connecting the City: Panhandle Outreach for JFK Separated Bikeway

*8-10am / Panhandle, Stanyan at Fell St*

Are you outreach trained and excited about Connecting the City? Help us gain support for a continuous, wide and comfortable bikeway on JFK Drive in Golden Gate Park. Email [tessa@sfbike.org](mailto:tessa@sfbike.org) if you want to spread the word and build support so you can ride on this new bikeway in a few short months!

**\*\* Wednesday, March 23rd \*\***

### SFBC Tube Times Folding Party

*5-8pm / SFBC Office, 833 Market St 10th Floor*

It's time to get the Spring issue of the Tube Times out on the street! The SFBC office will be hopping with friendly folks - chatting, snacking, and folding away until the folding is done. Can you come out and help spread the news about biking in the city? Dinner is provided. Bring your bike up to the 10th floor. Questions? Email [tessa@sfbike.org](mailto:tessa@sfbike.org) or just show up to volunteer.

### Workspace Bicycle Movie and Art Show \*

*7pm Doors, 8pm Movie / Workspace Limited, 2150 Folsom Street (at 17th)*

Bicycle Bride, a movie by a local filmmaker, uses the bicycle as a metaphor to show the changing face of Muslim women in America. Q and A w/ the filmmaker following the film both evenings (March 23 and 26); \$5-\$10 donation requested for beverage, popcorn, and filmSalon style art show - bicycle theme, info and to reserve your art space, e-mail [laniasher@sbcglobal.net](mailto:laniasher@sbcglobal.net)

**\*\* Thursday, March 24th \*\***

### SFBC Valet Bicycle Parking at Disposable Film Festival \*

*8pm / Castro Theatre, 429 Castro Street*

The SFBC will be parking bikes for the third year at this collection of the best disposable films made on everyday devices like cell phones, pocket cameras, and webcams. Rated one of America's "coolest film festivals," San Francisco is the first stop on its world tour. To volunteer as a bike valet [LisaRuth](#).

**\*\* Saturday, March 26th \*\***

**SFBC Valet Bicycle Parking at the Ferry Building Saturday Farmers Market**

*8am-2pm / Harry Bridges Plaza*

Pedal to the Ferry Building to fill up your panniers with local bounty and park your bike with the San Francisco Bicycle Coalition. All 52 weeks a year, the San Francisco Bicycle Coalition will be providing complimentary valet bike parking in Harry Bridges Plaza (look for the orange tent)

**\*\* Sunday, March 27th \*\***

**SF Bicycle Coalition Rec Ride: Birding by Bike**

*8:45am-2pm / Velo Rouge Cafe at the NE corner of Arguello and McAllister*

Meet SF Bicycle Coalition members Annie and David Armstrong for Birding by Bike! Ride through the Presidio and Golden Gate Park, looking for winter residents and early spring arrival species. The route follows mainly bike routes and is around 20 miles with a total elevation of about 1300 feet so you'll get a good workout too. Please bring water and a snack and don't forget binoculars! David is an amateur ornithologist who has been birding and leading trips in the city for the last 12 years.

SF Bicycle Coalition recreational rides are free for SFBC members (a \$5 donation from non-members is appreciated); rain cancels rides. Questions? Email Annie at (b) (6) (Events not sponsored by the San Francisco Bicycle Coalition are marked with an \*)

Subject Re: Fw: Luis Bocangel Internship Request

Hello Laura,

FYI - We are working on an external jobs announcement for the tribal solid waste team. I'm not entire sure when it will go out but I'm hoping in the next month or so. Luis could apply to that announcement if he's interested.

Thanks,  
Heather

Date: 02/03/2011 04:44 PM  
Subject: Fw: Luis Bocangel Internship Request

Heather and Laura:

Jared received an inquiry about internships from this student at SF State. He apparently interned with the SF Dept of Environment last year. I thought he was looking to volunteer, but he's looking for paid opportunities. I forwarded him to the website for info on our internship program for the summer, but thought I'd also cc you since he's interested in P2/Green Building type stuff, in case there are other internship opportunities that crop up in your divisions. Please forward if it's worthwhile to you or the folks you work with.

Cheers,

Laura Mayo

To: Laura Mayo/R9/USEPA/US@EPA  
Date: 01/31/2011 09:31 PM  
Subject: Re: Luis Bocangel Volunteer Internship Request

I would like to intern and the department of the environment because it is respective job in a professional environment where I can pursue my passion for helping with the environment to use. I enjoy working with people and would like to help promote environmentally friendly alternatives as well as contribute my time to help with current projects. I am interested in the fields of green building, laws and regulations, as well as restoration of nature.

## **Experience**

### **La Petite Baleen April 2009 to Present**

■ Working hands on teaching a variety of different age groups from babies to adolescents how to swim. At La Petite Baleen I how to deal with children and their parents and co-operate to create a fun and safe learning environment.

### **Vector Marketing June 2008 to April 2009**

■ Working at Vector I have gained advanced training in sales, great communication and time management skills.

**Department of The Environment April 2008 to Present.**

■ Working in the green building department I have learned how to organize contacts and other data on computer spread sheets, I got a nice feel for how the department worked but would have liked to be more involved in the ongoing projects themselves

**Cain Images March 2008 till April 2008**

■ Helped Mr. Doug Cain set up computer network in his office by running cables throughout hallways and rooms and putting them up on the walls.

**Education****School of The Arts High School 2005 to 2009**

I graduated from SOTA's vocal program. This program has gave me many great traveling opportunities for example we traveled to New York and performed at Carnegie Hall, but more importantly its taught me to work as a team with my other choir members in order to produce a wonderful sound.

**San Francisco State University****2009****to Present**

I am currently a sophomore majoring in International Relations. My love for people and traveling made it easy inspired me to pursue a career as a diplomat and help under represented countries.

**Skills**

I am a very responsible and reliable individual. Always make sure I bring an excellent attitude to work. I am tech savvy and fluent in Spanish however I would say my strongest skill is my people skills since I am very polite and outgoing.

Hey Jared,

I'm sure that you are inundated w/ requests for internships - but thought I would pass this one along as I can personally vouch for Tony. He graduated from Lick-Wilmerding (where he excelled) and then as you can see he whaled at Berkeley too.

Really nice guy - no drama! - hard worker, great sense of humor (which I think is a key personality trait). He will be an asset to whomever he works for - keep your eye on this one.

hope you are enjoying your break.

see you soon!

me

Hi ladies,

I hope that you guys are well and look forward to seeing both of you soon.

At the dinner at Barb's house we talked about the Rooftop connection with EPA's Jared Blumenfeld (?). Tony has sent his resume and transcript to the EPA, which is all that is required. Do you feel comfortable putting in a good word for

Tony with him or mentioning that a Rooftop alum is looking for an EPA internship? Tony's interest is hydrology and he will be attending Stanford next year to get his Master's degree in this area.

Any help or suggestions you have would e most appreciated.

Thanks, Martha

**Subject:** Video Letter to Obama

Hi Jared,

Here it is as promised. Can you send it on to the White House? 10 truly green jobs that don't cost the taxpayers a dime are at stake here.

I have offered to RPD a compromise which would down size parts of the recycling operation and begin implementation of the "Garden Resource Center" at not cost to the City. They are planning on spending \$250K+ in taxpayer dollars on the new Garden Center.

Also in jeopardy is the Garden For The Environment. HANC is the fiscal agent and funder of last resort. Last year, \$48k of the recycling center's surplus went to underwrite the GFE's deficit. HANC spent another \$14k on the GFE in the last quarter.

I hope Obama is coming to town on the 20th. Maybe he can stop by for a tour!

Thanks,

Ed

**FOR IMMEDIATE RELEASE**

April 13, 2011

## THURSDAY: EPA Administrator Jackson to Join USPS to Unveil Go Green Commemorative Stamps

**WASHINGTON** – U.S. Environmental Protection Agency (EPA) Administrator Lisa P. Jackson will join the United States Postal Service (USPS), environmental advocates and educators on Thursday, April 14, to unveil the USPS's new *Go Green* commemorative stamps. As Earth Day approaches, April 22, the new

stamps demonstrate easy steps everyone can take to improve and protect our environment.

**WHO:**

EPA Administrator Lisa P. Jackson  
Ronald Stroman, Deputy Postmaster General, USPS  
Emil Dzuray, Acting Chief Sustainability Officer, USPS  
Alexandra Pardo, Academic Director, Thurgood Marshall Academy  
Patrick Pope, Principal, Savoy Elementary  
Sean Miller, Director Education, Earth Day Network  
Gerald Roane, Postmaster, Washington, DC

**WHAT:**

The U.S. Postal Service and EPA Administrator Jackson unveil the 2011 Social Awareness stamp subject — Go Green

**WHEN:**

Thursday, April 14, 2011  
11:00 a.m. EDT

**WHERE:** Thurgood Marshall Academy Public Charter High School and Savoy Elementary School  
(shared schoolyard)  
2724 Martin Luther King Jr. Ave., S.E.  
Washington, D.C.

\*Parking available in open lot directly across street from school

Just checking in. Want anything more re. SJV PM 2.5? Would you like our thoughts on the next issue we think you need to be engaged with, or is that too much verbage in too short a time?

----- Forwarded message -----

From: Sona Chilingaryan (b) (6)

Date: Tue, Apr 12, 2011 at 4:10 PM

Subject: top 3 SJV issues that need your leadership this year

To: jaredblumenfeld@comcast.net

Cc: (b) (6)

Niloufar is cc'ed above. (b) (6)

To make environmental gains in SJV, we need your leadership and clear policy direction to look

for all possible ways in which gains can be made. A lack of this direction from you will mean that we will continue to try to make submittals from CARB and SJVAPCD 'work.'

Here are the top 3 SJV issues, which with your help, can get us the biggest bang for our buck this year.

1. SJV PM 2.5 Plan (EPA action planned for mid-May)
2. SJV 1-hr and 8-hr Ozone Plans (1-hr work is on-going; EPA action for 8-hr planned for July)
3. Productive dialog with SJV community/environmental groups (you've already done several things to facilitate productive dialog but lack of follow through by those below you is hindering progress)

SJV PM 2.5 Plan

(b) (5) Deliberative

While HQ will need to weigh in on the action, your involvement **before we go to HQ** can lay out a different direction. You are far more likely to influence the outcome if you engage now. To help you engage, you should ask for a briefing paper that asks the following questions:

What were the deficiencies we identified in the proposed action on SJV's PM 2.5 Plan last November?

What did CARB submit in response to our proposed partial disapproval?

How did that information address the deficiencies?

What options do we have to get CARB/SJVAPCD to be more stringent?

We'll pass on thoughts about # 3 above next week. As for #2, we'll pass on thoughts about SJV 1-hr as things develop and we'll be in touch about the SJV 8-hr plan about a month and a half before we act on it in July.

Hope this helps!

**Subject:** Fwd: OCEAN BEACH CLEAN UP 4/25 & FAMILY ART HOMEWORK

Hello Fellow B-23 Parents and Happy Earth Week!

If you haven't heard, there's going to be an impromptu Ocean Beach Clean-Up on our Furlough Day tomorrow as part of Earth Week celebration. If you haven't made plans, I hope you'll consider joining in on the fun! Please see the full details below - and kindly note that although the message says that there will be gloves and buckets there, if you have some at home that you can bring for your own family, that would help to ensure that we have enough for everyone.

Also attached are two pdfs outlining the instructions for this year's Earth Day Family Art Homework activity -- "FEELING GOOD" - AN EARTH DAY CHALLENGE. This is an optional activity designed by Rooftop's Art Committee. We hope that your family will contribute your creativity to our collaborative art installation that will be on display in the MPR at Open House.

Cheers, Amy

#### **OCEAN BEACH CLEAN UP**

**Monday, April 25 (Furlough Day) from 11 am - 2 pm**

**Ocean Beach Parking Lot, Stairway #23 (near Lincoln Way & The Great Highway)**

Dear Rooftop Families,

You are invited to join us for a clean up day at Ocean Beach,  
Everyone can bring a picnic lunch to enjoy the day. We'll bring some gloves and buckets for our clean up efforts. Please note that students will need to be supervised by a parent.

We are pleased to announce that we will be joined by

**Dr. Wallace J. Nichols and Sarah Kornfeld of The Blue Marbles Project.**

Learn more about The Blue Marble Project at [www.bluemarbles.org](http://www.bluemarbles.org).

This project has been an amazing journey thanks to our collaborative efforts. We hope that you will enjoy seeing Rooftop's photo albums of The Voyage of the Blue Marble.

**Subject:** Fwd: OCEAN BEACH CLEAN UP 4/25 & FAMILY ART HOMEWORK

Hello Fellow B-23 Parents and Happy Earth Week!

If you haven't heard, there's going to be an impromptu Ocean Beach Clean-Up on our Furlough Day tomorrow as part of Earth Week celebration. If you haven't made plans, I hope you'll consider joining in on the fun! Please see the full details below - and kindly note that although the message says that there will be gloves and buckets there, if you have some at home that you can bring for your own family, that would help to ensure that we have enough for everyone.

Also attached are two pdfs outlining the instructions for this year's Earth Day Family Art Homework activity -- "FEELING GOOD" - AN EARTH DAY CHALLENGE. This is an optional activity designed by Rooftop's Art Committee. We hope that your family will contribute your creativity to our collaborative art installation that will be on display in the MPR at Open House.

Cheers, Amy

## **OCEAN BEACH CLEAN UP**

**Monday, April 25 (Furlough Day) from 11 am - 2 pm**

**Ocean Beach Parking Lot, Stairway #23 (near Lincoln Way & The Great Highway)**

Dear Rooftop Families,

You are invited to join us for a clean up day at Ocean Beach,

Everyone can bring a picnic lunch to enjoy the day. We'll bring some gloves and buckets for our clean up efforts. Please note that students will need to be supervised by a parent.

We are pleased to announce that we will be joined by

**Dr. Wallace J. Nichols and Sarah Kornfeld of The Blue Marbles Project.**

Learn more about The Blue Marble Project at [www.bluemarbles.org](http://www.bluemarbles.org).

This project has been an amazing journey thanks to our collaborative efforts. We hope that you will enjoy seeing Rooftop's photo albums of The Voyage of the Blue Marble.

Awesome! Have fun!

I was hoping to attend, but there's an imminent hiring freeze, so I need to stay back and get our summer interns squared away.

Cheers,  
Laura

Jared read about this in the Mercury News and I saw it in the Chronicle this morning. Please let me know what additional info you have or can find out, especially if this might be related to MCLB Barstow, as intimated in the Chronicle. Jared will be on a weekly call with HQ at 10:00, so if you know anything by then, or by the 11:00 SMT meeting, please let me know so I can pass it along. I imagine someone in

Corine Li's Drinking Water Office will be reaching out to the water company looking for info, so you might want to touch base with them to avoid duplicating efforts. Thanks.

I didn't know about Barstow until I saw it in the Chronicle this morning. The Marine Corps base is an NPL site. I am checking and will update you in the morning.

Lynn -

I appreciate our phone call today regarding the Nebo water supply. Based on our conversation, I understand that the water supply for the Nebo Base contains concentrations of perchlorate at 20 ppb, which is above the MCL of 6 ppb. I would appreciate if you could provide analytical results of the sampling that was conducted yesterday and of any notifications that have been issued at the Nebo Base. Our office has contacted Department of Public Health (DOPH) in San Bernardino that regulates Golden State Water supply wells. Source well data collection is in progress. DOPH will determine next steps and has requested that the public's concerns be addressed to Sean McCarthy district engineer at 909-383-4328.

Thanks  
Omar

Subject: Perchlorate in Barstow drinking water - article and request for DTSC contact person for Barstow area

## Perchlorate Roundable:

You may have read over the weekend about Barstow's water supply being affected by perchlorate (up to 100 ppb in one well). Here's a recent article:

<http://www.latimes.com/news/local/la-me-barstow-water-20101122,0,1933895.story>

Our Field Operations staff would like to contact the appropriate DTSC person/people for information on perchlorate-related sites and activities in the Barstow area.

Who would that be?

Please contact: Heather Collins, P.E., Chief, South Coast Section, California Department of Public Health at [Heather.Collins@cdph.ca.gov](mailto:Heather.Collins@cdph.ca.gov)

Thanks.

Subject: Fw: Perchlorate in Barstow drinking water - article and request for DTSC contact person for Barstow area

---

John and Phil -

The State of California and USEPA have a long history of cooperation and full communication on perchlorate. The State has allowed Region 9 (me) to participate in their monthly roundtable workgroup on Perchlorate and Other (Emerging) Contaminants. I could not attend the November 18 teleconference, but my email traffic did not indicate that there was an issue in Barstow. The attached email seems to suggest that DTSC may not been fully communicating with Cal DPH Drinking Water folks on this matter.

Both EPA and the State have been remarkably diligent in looking for current and potential problems with perchlorate in California. We have requested information from DOD on locations and facilities in Region 9 and nationally where perchlorate would be used. We have published this information at:

[http://www.epa.gov/fedfac/documents/perchlorate\\_releases\\_us\\_20050325.htm](http://www.epa.gov/fedfac/documents/perchlorate_releases_us_20050325.htm)

The EPA Federal Facilities website table mentions many California DOD facilities, but does not appear to mention Barstow.

We provided our information to GAO for their 2005 occurrence publication. GAO also had a little more cooperation from DOD than we had. I do not recognize a facility that would correspond to Barstow.

GAO 05-462 May 2005.pdf

The State of California also keeps track of perchlorate occurrence in public water supplies. Their DPH Drinking Water webpage was last updated in August and I do not recognize Barstow.

<http://www.cdph.ca.gov/certlic/drinkingwater/Pages/Perchlorate.aspx>

Please let me know if I can help.

Subject: Perchlorate in Barstow drinking water - article and request for DTSC contact person for Barstow area

---

### Perchlorate Roundable:

You may have read over the weekend about Barstow's water supply being affected by perchlorate (up to 100 ppb in one well). Here's a recent article:  
<http://www.latimes.com/news/local/la-me-barstow-water-20101122,0,1933895.story>

Who wOur Field Operations staff would like to contact the appropriate DTSC person/people for information on perchlorate-related sites and activities in the Barstow area.

Who would that be?

Please contact: Heather Collins, P.E., Chief, South Coast Section, California Department of Public Health at [Heather.Collins@cdph.ca.gov](mailto:Heather.Collins@cdph.ca.gov)

Thanks.

Kevin, Thanks for pro-actively reaching out! The data bases you have shown below confirm my understanding - that MCL Barstow is not a known source of perchlorate contamination. The Navy detections were in NEBO portion of the facility's water supply that is provided by Golden State Water Company. EPA, State, and County reps will meet today to talk about sampling results and public health issues; I am waiting to determine where the contaminated well(s) are located in relation to BMCL Barstow to determine if there is federal facility connection to this contamination. Thanks again for the information...Phillip

Subject: Fw: Perchlorate in Barstow drinking water - article and request for DTSC contact person for Barstow area

John and Phil -

The State of California and USEPA have a long history of cooperation and full communication on perchlorate. The State has allowed Region 9 (me) to participate in their monthly roundtable workgroup on Perchlorate and Other (Emerging) Contaminants. I could not attend the November 18 teleconference, but my email traffic did not indicate that there was an issue in Barstow. The attached email seems to suggest that DTSC may not been fully communicating with Cal DPH Drinking Water folks on this matter.

Both EPA and the State have been remarkably diligent in looking for current and potential problems with perchlorate in California. We have requested information from DOD on locations and facilities in Region 9 and nationally where perchlorate would be used. We have published this information at:

[http://www.epa.gov/fedfac/documents/perchlorate\\_releases\\_us\\_20050325.htm](http://www.epa.gov/fedfac/documents/perchlorate_releases_us_20050325.htm)

The EPA Federal Facilities website table mentions many California DOD facilities, but does not appear to mention Barstow.

We provided our information to GAO for their 2005 occurrence publication. GAO also had a little more cooperation from DOD than we had. I do not recognize a facility that would correspond to Barstow.

GAO 05-462 May 2005.pdf

The State of California also keeps track of perchlorate occurrence in public water supplies. Their DPH Drinking Water webpage was last updated in August and I do not recognize Barstow.

<http://www.cdph.ca.gov/certlic/drinkingwater/Pages/Perchlorate.aspx>

Please let me know if I can help.

Kathleen Salyer and I spoke a bit with Harold Singer about the Barstow perchlorate situation. He is the Executive Office of the Lahontan Regional Water Quality Control Board and we primarily discussed the Leviathan Mine Superfund project.

I went through a list of products and practices involving perchlorate, and talked a bit about natural perchlorate (atmospheric source, accumulation in arid soil). He asked about an appropriate EPA contact and we recommended Corine Li in Water Division. I sent him some electronic journal articles on perchlorate in arid soil and about isotopic forensics to differential between natural and man-made perchlorate. I gave him contact information for a researcher who performs isotopic analyses on perchlorate.

He does not have an obvious source. The federal facility is downgradient from the wells. From what we understand about the concentration, it seems too high to be a natural source.

Hi Kevin,

Thanks for the heads up about the perchlorate in Barstow's groundwater. Its source is curious. From news accounts it seems that a supply well in the northeast part of town was producing >100 ppb ClO<sub>4</sub><sup>-</sup>. Levels that high strongly suggest an anthro source. Looking at the east side of town, there is a large excavated area at the end of Slack Road (also called Armory Road) right where it joins the USMC Logistics Base. It would be interesting to know its history. The base parallels the Mojave River bed, with what look like sewage treatment ponds (one of which has apparently been converted to a golf course) in a narrow swath of land separating the base from the river bed. I wonder if anyone is looking for the old armory and potential perchlorate disposal there. Isotopes might help distinguish a natural from anthro source. The last thing Barstow needs is to discover that its production field has started sampling the edge of a plume.

Please keep me posted.

With best regards,  
Dave

Subject: Groundwater conditions at Barstow

---

Hi Kevin,

The USGS office in San Diego developed a regional groundwater flow model for the Mojave River basin in cooperation with the Mojave Water Agency and the USMC (Stamos et al., 2001). Figure 6 from that report (attached) shows a map of the modeled area that includes a pertinent detail of recharge features in Barstow.

I came across some text stating that production wells in and around Barstow tap both the shallow ("floodplain") aquifer immediately adjacent to the channel as well as the deeper, regional aquifer. The floodplain aquifer would presumably have wells that are less than 100 m deep in most places.

A stream gage was installed at Barstow in 1930 and has been operated more or less continuously since. The channel conveys large quantities of water every few years, as documented by a picture of the gage during a January 1993 flood in the other attachment (from Lines, 1996).

The references are given below, with links to full reports. The 1996 report is in DejaVu format, which requires a free browser plug-in to view.

Let me know if you have any questions.

Happy Thanksgiving!  
Dave

Jim -

Apparently the Lahontan Regional Water Quality Control Board let CDPH know yesterday morning that they may have identified the source of the contamination as illegal handling or dumping of perchlorate by a "Mojave River Pyrotechnics", per archived files at the Barstow Fire Department. It appears that our speculations were not so off after all.

I hope to learn more before our followup call with Senator Boxer's staff on Monday (yet to be scheduled), though it appears that the waterboard has the lead.

---

Corine,

The Waterboards (Lahontan) identified information late yesterday which they conveyed to CDPH this morning from the archives of the Barstow Fire Department files. The file is now in the possession of the Waterboards and they are reviewing it with their staff. "Mojave River Pyrotechnics" name was found in this file which documented illegal handling or dumping of perchlorate. Last know date - mid 80's. This facility is ~1 mile upgradient of GSWC's Soapmine well. I am not certain who may be taking the lead on the investigation, but we have been talking with GSWC, County of San Bernardino Environmental Health, Waterboards, USMC-Nebo, DTSC, and yourselves about this.

- ALL AREAS

Heather -

Great news...though now the questions we will be asked is the what, who, when how.....regarding source contamination.

Could you provide any information regarding efforts underway by stakeholder agencies (Golden State Water Company, USMC, county health) to identify source....for example, who is taking the lead and for what, and next steps...

Boxer will likely want to know in our followup call on Monday.

Subject: RE: Cancellation of Barstow Tier 1 Public Notice "DO NOT DRINK" - GSWC-Bartow Perchlorate - ALL AREAS  
ct:

---

The California Department of Public Health has received the latest sampling information for Veterans Home of Barstow, located at: 140 VETERANS PARKWAY, BARSTOW.

The analysis confirms that the water served to all areas of Barstow now complies with the perchlorate MCL. Golden State Water Company has received approval to LIFT the unsafe water alert for the entire system, including the Veteran's Home.

This message **ENDS** the alert for the water system.

Thanks,

**HEATHER**

The California Department of Public Health has lifted the Do Not Drink Water Advisory for ALL customers in the Barstow water system [excluding the Veterans Home of Barstow, located at: 140 VETERANS PARKWAY, BARSTOW](#). This is based on data that confirmed the system meets drinking water standards.

Timing of this Messaging - Golden State Water Company will communicate the following message tonight. The Reverse 911 calls will be starting to roll out as of 2100. GWSC is issuing a media statement on the local cable channel with City of Barstow and County of San Bernardino officials at 9:30 pm tonight. GSWC will be issuing a general press release at the same time and will be updating their website tonight, also ([www.gswater.com](http://www.gswater.com))

Thanks,

Heather Collins

**Subject:** FW: Cancellation of ENTIRE Barstow Tier 1 Public Notice "DO NOT DRINK" - GSWC-Bartsow Perchlorate - All areas no longer impacted

Hi All,

Golden State Water Company called between 3 and 4 am this morning to report slightly elevated results from 2 reservoirs. The results were 10 and 9.8 ppb respectively. The MCL is 6ppb. These results were received around 3:00 am. All other result of sampling has been less than the MCL. We're waiting for confirmation from six additional samples taken this morning that will be analyzed by Metropolitan Water District LaVerne Laboratory Facility. These results should be available at ~ 4:00 p.m. this afternoon. Until we receive these results the current "Do Not Drink Water Advisory" is still in place.

Stephen Woods, Assistant Chief  
DDWEM

**Subject:** Tier 1 Public Notice "DO NOT CONSUME" - GSWC-Bartsow Perchlorate

**Importance:** High

**Golden State Water Company – Barstow System, San Bernardino County, CA**

(City of Barstow and surrounding unincorporated areas)

ZIP Codes – 92310, 92311, 92312

Number of water system customers ~ approximately 25,725 through ~ 9,233 service connections

A **Tier 1 Public Notice "Do Not Consume"** has been issued by GSWC-Barstow approximately at 1500 November 19, 2010, due to **perchlorate** levels above the maximum contaminant level (MCL) of 6 parts per billion. Additional samples from GSWC-Barstow's active wells and distribution system have been collected and are being rushed to the laboratory for prompt analysis.

Results for the active wells are expected this evening, while distribution samples will be ready Saturday morning. When these sample results are received, we will know the extent of the perchlorate in the system and then work with GWSC-Barstow on further steps to ensure drinking water for the community.

One of GSWC-Bartsow's customer's is USMC-Nebo.

We have been in contact with the Waterboards (Lahontan Region) and local County Health (San Bernardino).

Our local office is responding to consumer and business inquiries (mainly phone calls at this time). We are also receiving reports that news alerts are now coming through ABC-local news tv.

Dave-

Here is the link and a file with the letter from Kerr-McGee listing a couple of perchlorate customers in Barstow.

<http://www.epa.gov/fedfac/pdf/covington.pdf>

This webpage can be found through the EPA fedfac page and this link  
<http://www.epa.gov/fedfac/pdf/covington.pdf>

There was a very thorough investigation of fireworks waste disposal and perchlorate in both public and private wells conducted in Suffolk County (Long Island) New York. I was quite impressed with the work by Paul Ponturo of the Health Department there. He retired but is working as a consultant. I found this on Google (since I do not have access to my archived email files today):

Paul Ponturo

Sr. Water Resources Engr., H2M Group  
Consultant  
Melville, New York  
Suburban

**Personal Dialogue Statement :**

I am currently working on a number of regulatory and compliance issues relating to including emerging contaminant review and monitoring program design. Prior to my July 2008 retirement, I worked for the Suffolk County Department of Health Services in NY where I served as a Public Health Engineer since 1972. I supervised a staff of 34 in enforcing drinking water regulations controlling Suffolk's 400 community and non-community public water supplies, and the Department's own programs to monitor drinking water supply quality and quantity of the groundwater resource, conducting surveys and investigations of the county's hydrogeology, and participating in special studies.

Former fireworks maker suspected in Barstow's water contamination

By DAVID DANELSKI  
Riverside Press-Enterprise  
December 3, 2010

A former fireworks company has emerged as the potential source of a chemical that last month contaminated public water supplies in the Barstow area, making tap water undrinkable there for as many 40,000 people for several days, say state water quality control officials.

The Mojave River Pyrotechnics Co. closed its doors in Barstow in the mid-1980s, but records kept by the U.S. Environmental Protection Agency showed that it had received shipments of perchlorate, an explosive salt used to make fireworks, ammunition and solid-state rocket fuels, say state officials.

The company had operated near a drinking-water well in north Barstow that last month was found to be producing water with 100 parts per billion of perchlorate -- more than 16 times the allowable limit for drinking water. And tap water at the Marine Corps Logistics Base, just east of Barstow, was found to have perchlorate at more than three times the legal limit of 6 parts per billion.

This reporter called me on Dec 2. I gave him the Federal Facility web page that has the primary documents. The 104(e) response from Kerr-McGee lists companies that received perchlorate shipments, including Mojave Fireworks.

Harold Singer, EO of Lahontan Water Board, seems to have given EPA some credit for sharing information with them.

Former fireworks maker suspected in Barstow's water contamination

By DAVID DANELSKI  
Riverside Press-Enterprise  
December 3, 2010

A former fireworks company has emerged as the potential source of a chemical that last month contaminated public water supplies in the Barstow area, making tap water undrinkable there for as many 40,000 people for several days, say state water quality control officials.

The Mojave River Pyrotechnics Co. closed its doors in Barstow in the mid-1980s, but records kept by the U.S. Environmental Protection Agency showed that it had received shipments of perchlorate, an explosive salt used to make fireworks, ammunition and solid-state rocket fuels, say state officials.

The company had operated near a drinking-water well in north Barstow that last month was found to be producing water with 100 parts per billion of perchlorate -- more than 16 times the allowable limit for drinking water. And tap water at the Marine Corps Logistics Base, just east of Barstow, was found to have perchlorate at more than three times the legal limit of 6 parts per billion.

Subject: Re: Perchlorate reported in Indio water supply

---

On the website for the Desert Sun [  
<http://www.mydesert.com/article/20101217/NEWS01/12170306/Indio-neighborhood-directed-not-to-drink-well-water> ], I found an article mentioning the concentration (7.6 ppb) and an indication that there may be only one well in this small public water supply system:

The Riverside County Environmental Health Department issued the advisory Thursday after two water samples per billion of perchlorate. The maximum level allowed is 6 parts per billion.

The contaminant has been linked to thyroid problems, said Jeff Johnson, program chief with the environmental health department.

“You'd probably have to consume it over a period of time before it (causes problems),” he said. But “it's certainly about.”

Water can still be used for showers and bathing, but residents are encouraged to use bottled water from a safe source, officials said.

Stan Triplett, a member of the Boe-Dell Heights Mutual Water Association board, which provides water to the neighborhood, said he received the contamination notification in person to all residents. About 120 homes are in that neighborhood south of Miles Avenue. Triplett said he did his research and doesn't think that amount of perchlorate will hurt him.

“I told people (Thursday) I'm going to continue to drink the water,” he said. “I just don't understand how it got in the water.”

Triplett plans to notify the county on Monday of how the water association will address the contamination.

“We're in a position where we might have to abandon our well and get a water supply from someplace else,” he said.

One option is to connect to the Indio Water Authority system, Triplett and county officials said. Debra Kaye, general manager of the Indio Water Authority said the agency is ready to help, if needed.

Here are results from earlier sampling of Boe Dell Heights wells, found at <http://www.cdph.ca.gov/certlic/drinkingwater/Documents/Perchlorate/Perchlorateforweb-08-02-2010.XLS>

Subject: Perchlorate reported in Indio water supply

---

Jim - I am sorry but I had not heard that Indio has perchlorate in public water supply wells. One well of the Boe del Heights Water Co. in Indio had about 5 ppb perchlorate for the last several years, through the most recent monitoring result that I have (March 29, 2010 at 4.7 ppb). I do not have the more recent data that the news report seems to be citing. Since the California drinking water standard is 6 ppb, it is possible that the Indio well has exceeded 6ppb. If so, the levels may be only slightly above the standard (or they could be much higher than 6 ppb).

The Colorado River had approximately 4 to 10 ppb perchlorate concentrations from the 1990s until about 2004. In our 2005 monitoring results, we observed the perchlorate concentration beginning to decrease as the source was more effectively captured. Since August of 2008, the Colorado River perchlorate concentration has remained below 2 ppb.

Salts, such as perchlorate, in irrigation water are often concentrated due to evaporative losses in arid areas. The salts can show up in groundwater recharged by the irrigation at levels higher than the original source. In the case of Barstow's wells, the concentrations were much higher than expected from a Colorado River legacy, so an alternative source of perchlorate release was suspected.

I am sorry that my response is so general since I have no recent information specific to Indio's situation.

Morning Jim,

We saw that drinking water for a neighborhood in Indio also has perchlorate in it.

I'm contacting the state, too, but I wanted to check in to see if EPA is following up on this?

Thanks,

Grant

Indio-area residents told not to drink water  
The Associated Press  
Posted: 12/17/2010 05:39:12 AM PST  
Updated: 12/17/2010 05:39:13 AM PST

INDIO, Calif.—Residents of a Riverside County neighborhood near Indio are being warned to avoid drinking tap water because it's tainted with high levels of a chemical used in rocket fuel and fireworks. Health officials say lab results showed elevated levels of perchlorate in water supplied to about 120 homes by the Boe del Heights Mutual Water Co.

Raymond Smith of the county's environmental health department says residents of the unincorporated area have been notified that they should avoid drinking the water or using it for infant formula or food preparation. It is safe for bathing.

The source of the perchlorate isn't known.

Authorities tell the Riverside Press-Enterprise that the water company will decide next week whether to drill a new water well or use supplies from elsewhere to dilute the chemical.

---

Here is a first draft of a Powerpoint on perchlorate background and occurrence. I can make this presentation in about 15 minutes. I stop before entering toxicology or regulatory issues, expecting other speakers to cover that.

A couple of main points besides the relatively recent attention to this chemical and how widespread perchlorate is in the environment from man-made and natural sources.

1) Information on occurrence:

Much of the occurrence information has been looking for superfund-type releases (sources), and much has been specifically for public water supply occurrence. These two types of information are not always interchangeable or additive, so the published data must be qualified.

2) Food: Perchlorate exposure through food - including milk, formula and breast milk - is not fully captured by information on water contamination.

Please let me know if you would like additional information or emphasis.

Subject: Perchlorate Info

---

Here is the California Department of Public Health information at <http://www.cdph.ca.gov/certlic/drinkingwater/Pages/Perchlorate.aspx> There is much more information through the links on their page.

## Perchlorate in Drinking Water

Last Update: January 7, 2011

Perchlorate is a regulated drinking water contaminant in California, with a [maximum contaminant level](#) (MCL) of 6 micrograms per liter (µg/L). The MCL became effective October 2007. For information provided to public water systems by the CDPH Drinking Water

Program about the implementation of the MCL and the scheduling of monitoring, see links at the bottom of this page.

Perchlorate and its salts are used in solid propellant for rockets, missiles, and fireworks, and elsewhere (e.g., production of matches, flares, pyrotechnics, ordnance, and explosives). Their use can lead to releases of perchlorate into the environment. Perchlorate's [interference with iodide uptake by the thyroid gland](#) can decrease production of thyroid hormones, which are needed for prenatal and postnatal growth and development, as well as for normal metabolism and mental function in the adult. Its effects on the thyroid gland are the basis of the [6-µg/L public health goal \(PHG\)](#) established in 2004 by Cal/EPA's Office of Environmental Health Hazard Assessment. (PHGs contribute to the development of MCLs, [as described here](#).) In January 2011, OEHHA released a draft technical support document for a [1-µg/L PHG for perchlorate](#).

Monitoring, first in 1997 by the [Drinking Water Program](#) and then by public water systems, showed perchlorate to be a widespread drinking water contaminant, occurring in several hundred wells, mostly in southern California (see [early findings](#)). Perchlorate was also found in the Colorado River, an important source of water for drinking and irrigation, where its presence resulted from contamination from ammonium perchlorate manufacturing facilities in Nevada.

For this presentation, we've used monitoring results since January 1, 2006, which are available for about 11,100 sources --"sources" include pending, inactive, and destroyed or abandoned sources; monitoring wells; agricultural wells; and sources with peak detections below the DLR. From these, we extracted the perchlorate findings in active and standby sources that had reported detections at or greater than 4 µg/L and greater than 6 µg/L, concentrations that correspond to perchlorate's detection limit for purposes of reporting (DLR) and the perchlorate MCL, respectively. These are presented in Table 1. Where raw and treated samples or other results indicate more than one sampling point for the same source, they are counted as coming from a single source. All detections, however, are [included here](#) ([Excel, 1.9MB](#)) .

These findings are helpful in identifying areas in which perchlorate has affected sources of drinking water (principally wells), but they should not be interpreted as representative of water being served by public water systems. Consumers interested in finding out more about the quality of their drinking water should refer to their water systems' annual [consumer confidence reports](#) (CCRs). Many CCRs for California water systems are available on the [US EPA's website](#).

Data in Table 1 should be considered draft, since they will change with subsequent updates.

| Table 1. Active and Standby Sources with Perchlorate Detections<br>(August 1, 2006 - August 2, 2010) |                                      |                                |  |  |

Another source of information can be accessed through this EPA web page:

<http://www.epa.gov/fedfac/documents/perchlorate.htm>

The links to related information, including nationwide occurrence, are probably better than the web page itself. GAO has a 2005 report on occurrence of perchlorate that can be reached through the Perchlorate Links.

This is probably more than you wanted but this paper was published on Jan 19, 2011:

USGS 2011 Perchlorate Background in GW Fram&Belitz\_2011\_CIO4\_ES&T\_es103103p.pdf

and related:

ES&T 2007 Perchlorate in Arid SW.pdf

Here is the article about food, with the supplemental tables mentioned in the publication:

---

Will -  
 Good talking to you yesterday.

This is an email I received from Dave Stonestrom, the USGS researcher in Menlo Park.

This is a 2007 paper examining perchlorate transport through arid vadose zone, with figure 2 comparing chloride, nitrate and perchlorate.

ES&TJune 2007 Arid Vadose ClO4.pdf

Here also is a quote from a paper he published on indications that water from the surface (precipitation) does not normally reach the water table in the desert. That paper also mentions the role of vegetation on preventing downward movement of water through the vadose zone in the desert.

The accumulation of large quantities of atmospherically deposited chloride just beneath the root zone (fifth panel) supports the interpretation of upward water flow, showing that the lack of deep percolation (and ground-water recharge) extends back in time thousands of years.

Stonestrom2004 Arid Vadose.pdf

Here is his contact information:

 Subject: Groundwater conditions at Barstow

---

Hi Kevin,

The USGS office in San Diego developed a regional groundwater flow model for the Mojave River basin

in cooperation with the Mojave Water Agency and the USMC (Stamos et al., 2001). Figure 6 from that report (attached) shows a map of the modeled area that includes a pertinent detail of recharge features in Barstow.

I came across some text stating that production wells in and around Barstow tap both the shallow ("floodplain") aquifer immediately adjacent to the channel as well as the deeper, regional aquifer. The floodplain aquifer would presumably have wells that are less than 100 m deep in most places.

A stream gage was installed at Barstow in 1930 and has been operated more or less continuously since. The channel conveys large quantities of water every few years, as documented by a picture of the gage during a January 1993 flood in the other attachment (from Lines, 1996).

The references are given below, with links to full reports. The 1996 report is in DejaVu format, which requires a free browser plug-in to view.

Let me know if you have any questions.

Happy Thanksgiving!  
Dave

Dear Abigail Gaudario,

George had a dental appointment around 4:00pm on that day, can advance to the meeting at 2 pm?  
Does that work for Mr. Jared?

Thanks,  
Jessie L

**Subject:** Fw: South Coast and San Joaquin Valley PM 2.5 Re-proposals - Briefing Paper for our  
call tomorrow at 9 am Pacific (12 noon eastern)

The attached paper was used on Wednesday to brief top levels of OAQPS and OGC before briefing Janet and you. Needless to say, it forms the basis of the notice, which was supposed to be ready to send to HQ on Friday, though I have not yet seen it. See pages 2, 3 and 4 in particular.

There were many people from multiple offices at the briefing who received this paper. I am assuming you heard about it from any number of sources outside the Region. Nevertheless, here it is.

Thanks. I am around if you need me.

**Subject:** ER (emissions reduction numbers)

The email below was in response to the question, "what kinds of emissions reductions are we getting from the truck/off road rule".  
I need to get Teddy's email address.

----- Forwarded by Niloufar Glosson/R9/USEPA/US on 05/31/2011 03:10 PM -----

From: Frances Wicher/R9/USEPA/US

To: Niloufar Glosson/R9/USEPA/US@EPA, Doris Lo/R9/USEPA/US@EPA, Wienke Tax/R9/USEPA/US@EPA, Lisa Hanf/R9/USEPA/US@EPA

Date: 05/31/2011 09:28 AM

Subject: Fw: Re: Draft PM2.5 Fact Sheet

---

I'm reluctant to include ER numbers from the truck & off road rules given how anemic they are: 1.7 tpd PM2.5 (all from truck rule nothing from off-road) and 1.4 tpd NOx (from both combined) - SJV numbers. Most of the "reductions" are coming from lower than previously expected economic activity (ie. the recession): 2.7 tpd PM2.5 and 63.1 tpd NOx.

We need to say something to the effect that due to the impact of the recession on the construction industry and the goods movement industry, emissions from these sources are much lower than we thought they would be and will remain low for the period covered by this plan, so fewer additional reductions are needed from these industries to attain PM2.5 standards.

I defer to Eric's judgment on progress on the ground--there are likely other alts to discuss beyond what Ragone is suggesting, and their biologist is actually quite helpful. But I see no reason why a staff meeting might not still proceed on 29th with yours to follow as proposed.

It occurs to me also that in the cursed ARNI timeline, we have a "3(b)" letter due from Jared 25 days after PN close, which I think nets out to...7/15. (thus the same problem we recently faced with his leave plans). We certainly could send an interim letter under your signature documenting progress post-3(a), but will still need to deal with the MOA. I will give Castanon a heads up about all this on Tues when I see him in Long Beach. JB

Alexis,

Thanks so much for your response and suggestions. If you are ok with it, let me make the following suggestion. We can have Forest Lawn send out a letter clarifying some issues relating to the June 15 letter and well as a description of the 5 or 6 alternatives analyzed.

After you have a chance to look at that we can set a meeting for the week of July 5.

If you're ok with it, let's cancel the meeting that was set at the biologist level for Wednesday the 29th.

If this works for you, we'll put the info together and get it over to you.

Thanks so much.

Cheers,

PWR

Dear Mr. Ragone,

I'd be glad to meet with you and your clients regarding this CWA 404 permit application. I suggest we include a manager from the Los Angeles Regional Water Quality Control Board and from Army Corps of Engineers (Los Angeles District), as well as our Associate Director, John Kemmerer, who recently conducted a site visit and leads our Water programs in So. California. We could accomplish this via video conference from our Los Angeles office with those of us here in San Francisco. I have an hour remaining next Friday morning at 9 am, or can suggest times for the week of July 5.

Important to the success of our discussion will be a robust analysis of the alternatives to filling tributaries of the Los Angeles River - would this be available well in advance of our meeting?

Kind regards,

Alexis Strauss

Director, Water Division

Hi Alexis,

My name is Peter Ragone and Jared suggested I email you re: the letter that the EPA issued related to the expansion of the Forest Lawn Cemetery in LA.

The operators of the cemetery would like to meet with you in the near future to share their plans and develop a cooperative relationship as they go through the final process of their entitlements.

You may be aware of this (I just learned of it myself) but Eric from EPA region 9's office did set up a meeting in SF next week on the topic of your letter with representatives of Forest Lawn. If at all possible, we'd like to have a meeting with you participating as well.

We would be willing to reschedule the meeting next week if that were possible.

Thank you for taking the time to discuss this issue, we look forward to working together. Thank you Jared for the introduction.

Cheers,

PWR

**To:** Alexis Strauss

**Cc:** Jason Brush; John Kemmerer

**Subject:** Re: Fw: Forest Lawn /CWA 404

My preference is to have a meeting on alternatives sooner rather than later since:

(1) We are rapidly approaching the end of the 25-day time period where we have to make a decision whether to send the "will affect" ARNI "b" letter. The final date to send this letter is July 13th. If we do not agree on a reasonable alternative by this date, I see no option but to send a "b" letter to the Corps.

(2) I will be on Annual Leave the week following the 4th of July.

However, if they want more time, then we can probably make arrangements to meet with them the week of July 5th (I can review the alternatives and give my written comments to John or Jason).

Thanks

Hi Jared

(b) (6)

9:00 am PST or 5:00 pm UK time works for Kelly, and her tel # is (b) (6). Does Mon, Jul 11 @ 9:00 am PST still work for you so that I can confirm with Kelly that you will call her?

Thanks,

Nelly

Thank you for your message. I'm working until the 12th, and will immediately catch an evening flight after work to go to New York City to handle personal business needs for 2 days. I'll be back Fri during my CDO to start packing for Philippines; I fly over the weekend. My mom and I will return late evening of Aug 1, and I report back to work on Aug 3. Abi will be back in the office on July 13th. Hope you have a good phone call with Kelly tomorrow. Don't forget to call her at 5:00 pm UK time, 9:00 am PST. (I'm assuming that you are at your parents house tomorrow). And warmest congrats to Helene!

Dear Jared,

I hope you are doing well.

I am writing now to see if you would be interested in providing an externship opportunity to Allie Silverman – one of my former colleagues and now entering her final year at Vermont Law School.

Allie is absolutely wonderful – very bright, hardworking and completely committed.

Please let me know asap if there might be an opportunity with you or elsewhere in the Region 9 office for her.

Best,

Jacob

Subject Fw: Can you call AP Reporter to correct the facts

Mary, I think part of the confusion may be that the Governors actually signed something symbolic (the big pledge certificate that Jan Byers printed out), while the Governors did not actually sign the TMDLs as far as I know. Jared is right about the overall message of course...that we want people to know that the TMDL are actual regulatory mechanisms that will have real world effects. But the whole pledge certificate signing deal "muddied the waters" (so to speak).

[http://www.mercurynews.com/breaking-news/ci\\_18693583](http://www.mercurynews.com/breaking-news/ci_18693583)

She states that:

In a symbolic gesture, the two governors at an annual summit regarding the delicate ecosystem in the Tahoe basin signed an agreement that calls for reducing the amount of fine sediment that enters the lake over the next 65 years, with a goal of achieving clarity to 97 feet by 2076. It's an ambitious target and comes after a report that said Lake Tahoe's clarity fell more than 3 feet last year to 64.4 feet, its second lowest reading since the late 1960s. The governors also agreed to work together toward a new regional plan for managing the basin.

The TMDL is not a "symbolic gesture"

**Subject:** potential Qs for tomorrow's ozone briefing

I'm going to be at the ozone briefing at 2 (will also see you at 11 for ag. strategy) to talk about SJV's dairy & biosolids rules. I convinced Kerry to let me be up front about one thing I want to share re. the rules during the briefing so no need to discuss here. Below are questions that may be helpful to ask for 8-hr & 1-hr ozone, including minimal background.

Date: 08/19/2011 05:16 PM  
Subject: latest Kettleman comm documents

---

Here is the draft Kettleman press release, with our comments incorporated from today's briefing, and it has already been vetted by Jeff Scott and Michael Hingerty.

Kettleman RCRA Aug 19 v3.docx

Also, I've attached the timeline/Qs & As. Note that the only Qs and As there were revised were these 3:

**Q. If the facility is using an outside laboratory, has it shut down its own lab?**

No. The majority (about 70%) of all analyses needed are being performed at the outside lab, and they include the sensitive procedures to verify that Kettleman Hills facility's hazardous wastes meet treatment standards prior to disposal. The primary procedure still being performed at the facility's lab is the chemical 'fingerprinting' of incoming waste, to categorize the waste to make sure it is compatible with other wastes stored at the facility.

**Q. Will EPA continue to monitor CWM for violations? If so, how often?**

Yes, as a RCRA and PCB disposal facility, CWM will undergo an annual inspection by either the EPA or California DTSC.

**Q. What does this settlement mean for the PCB permit application?**

EPA takes into account the compliance status of a PCB landfill as part of any permitting decision. The facility has addressed all the compliance issues. EPA is planning to review and process the permit application submitted by CWM. EPA's review activities will include issuing a Notice of Deficiency to the facility for any improvements needed on its permit application, consultation with the Fish and Wildlife Service on potential impacts to endangered species, and consultation with the State Historic Preservation Office on potential impacts to archeological resources. As part of our process, EPA will continue our ongoing community

involvement efforts and will host one or more community meetings. When EPA makes a proposed permit decision, we will hold a formal public hearing.

Thanks all. New version looks good. A couple small potential suggestions-

-add "located about 3 ½ miles outside the community of Kettleman City." to the first sentence in the 3rd to last paragraph.

-make the link only the word "settlement" rather than "under the terms of the settlement"

Thanks!

**FOR IMMEDIATE RELEASE**

August 22, 2011

## **EPA Announces Settlement with the Department of the Interior to Resolve Violations at DOI Schools in Indian Country**

***Comprehensive settlement to improve environmental conditions at 164 DOI schools in Indian Country, benefitting more than 40,000 students***

**WASHINGTON** — The U.S. Environmental Protection Agency (EPA) today announced a comprehensive settlement with the Department of the Interior (DOI) to address alleged violations of waste, water, air, toxics and community right-to-know laws at schools and public water systems in Indian Country owned, operated, or the legal responsibility of DOI's Indian Affairs Office. The settlement will protect students' health and the health of communities in Indian Country by reducing potential exposure to environmental hazards.

"Children are more vulnerable to environmental exposures than adults, which is why ensuring that schools provide safe, healthy learning environments for our children, particularly in tribal communities, is a top priority for EPA," said Cynthia Giles, assistant administrator for EPA's Office of Enforcement and Compliance Assurance. "Today's landmark settlement will help strengthen public health and environmental protection in Indian Country and will improve environmental management practices at federally managed tribal schools."

Under the settlement, the DOI's Indian Affairs Office, comprised of the Bureau of Indian Affairs (BIA) and

the Bureau of Indian Education (BIE), will correct all of the alleged violations at 72 schools and 27 water systems. DOI will implement an environmental compliance auditing program and an environmental management system (EMS), designed to improve environmental practices at all of its BIE schools and BIA public water systems serving these schools. DOI has also agreed to install a solar energy system which will serve a school located in the Grand Canyon. The solar energy project will help ensure a more reliable source of electricity for the school and local community. DOI will also pay a civil penalty of \$234,844 which it must spend to correct violations of the Asbestos Hazard Emergency Response Act (AHERA) at its schools.

EPA conducted compliance inspections and data reviews at more than 100 BIE/BIA schools and public water systems. The settlement addresses all alleged violations under the Resource Conservation and Recovery Act, the Safe Drinking Water Act, the Clean Air Act, the Clean Water Act, the Emergency Planning and Community-Right-to-Know Act, the Toxic Substances Control Act's PCB provisions, and AHERA.

The settlement affects 60 tribes throughout the U.S. which have DOI Office of Indian Affairs schools or public water systems on or near their tribal lands. Consistent with EPA's consultation process with tribes, EPA consulted with the 60 tribes affected prior to finalization of the settlement agreement.

More information on the settlement:

<http://www.epa.gov/compliance/resources/cases/federal/bia-settlement.html>

Subject Re: Fw: Superfund site of the Week: Stoker Chemical in  
Imperial County | 89.3 KPCC

We looked into possibly de-proposing this site about a year and a half ago but did not pursue it because of other priorities. No state agency is currently working on it. Below is some of the info that Matt Mitguard dug up last year. Maybe we should re-look at deproposal.

The site still exists, but has not operated for many years. Removal of contaminated soil from the airstrip portion of the site (this was as pesticide applicator) was done. The site was originally scored using human targets living in a few ramshackle buildings adjacent to the site. Those buildings and those people are long gone. What is not gone are around 10 to 15 storage tanks which, if you believe the labeling, stored fuel and pesticides. I could not get close enough to some of their bung plugs to tell if they were empty or not. I assume they are except for tank sludge.

Bottom line - the site probably still has some hazardous chemicals in some of the soil and in some of the tanks. However, there are no human targets for miles (this is an ag area). Groundwater is not used for drinking in this vicinity. As far as I can tell there are not targets via soil or groundwater. Notwithstanding an endangered species living on this god forsaken strip of land, I cannot think of any reason why it would score, much less be put on the NPL.

Sent: Aug 29, 2011 1:58 AM

Dear Jared,

I wanted to share a great job opportunity with ex-colleagues at the EPA - the position is head of the ILO's green jobs / environment unit in Asia, based in Bangkok Thailand. See the vacancy announcement at:

[https://erecruit.ilo.org/public/hrd-cl-vac-view.asp?jobinfo\\_uid\\_c=25003&vaclng=en](https://erecruit.ilo.org/public/hrd-cl-vac-view.asp?jobinfo_uid_c=25003&vaclng=en)

[https://erecruit.ilo.org/public/hrd-cl-vac-view.asp?jobinfo\\_uid\\_c=25003&vaclng=en](https://erecruit.ilo.org/public/hrd-cl-vac-view.asp?jobinfo_uid_c=25003&vaclng=en)

As the USA is one of only two or three developed countries that qualify, there is a good chance for someone from the United States to get the post - particularly if they have US govt (Dept of Labor and EPA) support. Please share with qualified EPA staff. Apply by September 4 deadline, then perhaps request ILAB support (<http://www.dol.gov/ilab/><<http://www.dol.gov/ilab/>>).

The post requires international experience, policy experience, and knowledge of green jobs. The stronger the background and match, the greater the possibility of winning the competition.

As a United Nations post, this comes with great pay and benefits:

- \$150,000+ / year pay

- 30 days annual leave + 10 company days
- bi-annual fully paid vacation leave home for staff and family
- full education and health insurance coverage
- job security
- interesting work in exotic locations

AGAIN, PLEASE SHARE THIS WITH COLLEAGUES.

Regards,

Thom Gibbons

---

Teddy - the final agenda for the morning is attached, as are Frank Dean and Doug Overman's talking points. We'll be set up on the sea wall at Stairwell 16, across from the Beach Chalet in the parking lot on the great highway. It would be great if Jared could be there 10-15 minutes beforehand so we can get the show started right on time - the volunteers will be itching to get to cleaning!

My contact info is below, and my cell phone number is (b) (6)  
Please call anytime if you would like, and please send me your cell number in case there's any last minute changes.

Thanks!

Eben

Subject: RE: GreenBiz: Method Makes New Recycled Plastic Bottle from Garbage in the Sea

---

Teddy - the final agenda for the morning is attached, as are Frank Dean and Doug Overman's talking points. We'll be set up on the sea wall at Stairwell 16, across from the Beach Chalet in the parking lot on the great highway. It would be great if Jared could be there 10-15 minutes beforehand so we can get the show started right on time - the volunteers will be itching to get to cleaning!

My contact info is below, and my cell phone number is (b) (6)  
Please call anytime if you would like, and please send me your cell number in case there's any last minute changes.

Thanks!

Eben

The call with El Sol, Luis Lopez, went quite well. I provided quite a bit of backup detail (he was unfamiliar with Superfund), but got in some good points on the specifics as well. Also got in the point about this not being addressed if there wasn't an EPA. :-)

Let me know if you want more detail.

take care,

Regards,

Subject Fw: thoughts on sjv pm 2.5

Sent via BlackBerry by AT&T

---

**From:** Sona Chilingaryan (b) (6) >

**Date:** Wed, 21 Sep 2011 08:37:28 -0700

**To:** <jaredblumenfeld@comcast.net>

**Subject:** thoughts on sjv pm 2.5

The briefing paper they're putting together for you does an ok job of summarizing the comments that are difficult for us to respond to so I'm not going to summarize comments here. I know there isn't much possibility of changing course now, but I tried to come up with some questions that may be helpful to ask regardless.

1. We got comments (especially from CRPE) about allowing CARB to take credit for "recession reductions" being arbitrary and capricious since those reductions are based on voluntary behavior and there's nothing to prevent an increase in activity as the economy improves. I don't think anything has changed about it being viable for CARB to re-open the truck rule. If we're going to allow CARB to use the recession to claim they need fewer reductions, how can we finalize our action in a way that will stop states from getting out of reductions they originally said were needed every time there's an economic downturn they can use to revise emission inventories? How can we bound the spillover from this bad precedent?

2. CARB has made general commitments to get reductions needed for attainment that go beyond what they're getting from regulations that are already in place. CRPE and EarthJustice commented about CARB's commitments being too vague to be enforceable. Unlike 8-hour ozone which has a 2023 attainment date, SJV needs to attain this PM 2.5 standard by 2015. Can we get more specificity about where these new reductions are going to come from?

(b) (5) Deliberative

[REDACTED]

(b) (5) Deliberative

[REDACTED]

n.

5. CARB/SJV need to give us a PM 2.5 Plan for the newer PM 2.5 standard by the end of 2012, which means CARB/SJV already are or soon will be working on various aspects of that Plan and

will be releasing drafts for comments. It's so much easier to get agencies to address problematic issues prior to them adopting the plan at the state or local level. How are we going to work with CARB/SJV to make sure that the next PM 2.5 plan is a good one?

**Subject:** Potential extern this fall

Dear Jared,

I hope you are doing well.

I am writing now to see if you would be interested in providing an externship opportunity to Allie Silverman – one of my former colleagues and now entering her final year at Vermont Law School.

Allie is absolutely wonderful – very bright, hardworking and completely committed.

Please let me know asap if there might be an opportunity with you or elsewhere in the

Region 9 office for her.

Best,

Jacob

**, Governor Brown signed the  
Toxin-Free Infants and Toddlers Act  
into law!**

This landmark legislation will keep  
Californian kids safer and healthier by

banning bisphenol-A (BPA) from baby bottles and sippy cups. We couldn't have done it without the amazing outpouring of support from CLCV activists like you from across the state.

It just goes to show how much we can accomplish when we work together to pass common-sense legislation to protect California's environment -- and our people. And because California represents such a large consumer market, other states and countries will reap the benefits of our ban as manufacturers conform to our safer standard.

**Please help CLCV continue fighting to make California a healthier place for our families and our children. Click here to make a contribution today!**

Protecting our environment for our generation and for generations to come is a fight we can't afford to lose -- and California is on the front lines of that fight. With today's victory, we've proved that grassroots-powered campaigns to organize and mobilize the people of California can defeat even the most powerful corporate interests and their multimillion dollar lobbying efforts.

Thank you to Assemblywoman Betsy Butler for authoring the bill, and to everyone who signed on, forwarded, called, and donated to our efforts to pass the BPA ban. For the past five years, we have fought to protect our children from this toxic chemical -- and those efforts have culminated in this year's victory. Hundreds of thousands of California's children will be protected from a known cancer-causing chemical from this day forward.

**Even with today's victory, our fight is not over.** This victory is just one of many legislative priorities that CLCV will be fighting for in the months to come, from regulating hydraulic fracturing, to protecting our state parks from budget cuts, to increasing California's reliance on renewable energy.

CLCV is working to advance an ambitious legislative agenda to create a safer, cleaner California. **But we can't**

**do it without your activism and your financial support.**

Your contribution today will help us ramp up our calling programs, educate members of the legislature, and organize our members -- online and offline -- all across the state. Can you chip in?

**[Click here to protect California's environment and our people: Please help us build on our historic BPA victory by contributing to CLCV today!](#)**

Thanks again for being a part of our fight. We couldn't have achieved today's victory without you.

With enormous gratitude and appreciation,

Warner Chabot  
CEO, California League of Conservation Voters

this toxic chemical -- and those efforts have culminated in this year's victory. Hundreds of thousands of California's children will be protected from a known cancer-causing chemical from this day forward.

**Even with today's victory, our fight is not over.** This victory is just one of many legislative priorities that CLCV will be fighting for in the months to come, from regulating hydraulic fracturing, to protecting our state parks from budget cuts, to increasing California's reliance on renewable energy.

CLCV is working to advance an ambitious legislative agenda to create a safer, cleaner California. **But we can't do it without your activism and your financial support.**

Your contribution today will help us ramp up our calling programs, educate members of the legislature, and organize our members -- online and offline -- all across the state. Can you chip in?

[Click here to protect California's environment and our people: Please help us build on our historic BPA victory by contributing to CLCV today!](#)

Thanks again for being a part of our fight. We couldn't have achieved today's victory without you.

With enormous gratitude and appreciation,

Warner Chabot  
CEO, California League of Conservation Voters

Subject Getting there!! Key pieces....

The key pieces for your self-assessment are the 3 separate page-long narratives in Section D. D-1 is performance results overall, D-2 is business acumen, and D-3 is EEO accomplishments. Here, for your perusal, is a draft with 2 of the 3. I'm still working on D-1.

For all three, I'm cutting and pasting from all the SMT narratives that were submitted, and the Org Assessment, plus adding stuff that others didn't cover.....

This is due to Twanna/HQ at noon tomorrow. (I presume that means Eastern time....!)

**FOR IMMEDIATE RELEASE**

November 15, 2011

## California Man Sentenced to Five Years in Prison for Illegally Storing Toxic and Explosive Hazardous Waste in His Backyard

**WASHINGTON** – Edward Wyman, 64, from Reseda, Calif. has been sentenced to five years in federal prison for illegally storing toxic and explosive hazardous wastes in his backyard, materials that posed an imminent danger to nearby residents. The sentence is the longest handed down by a California federal judge in a hazardous waste case.

"Illegally storing toxic and explosive hazardous wastes is a crime and in this case a very dangerous one," said Cynthia Giles, assistant administrator for EPA's Office of Enforcement and Compliance Assurance. "Today's sentence shows that there are consequences to breaking the law and putting the public at risk."

"Today's sentence demonstrates the serious nature of federal environmental crimes," according to United States Attorney André Birotte Jr. "Federal environmental regulations exist to protect both public safety and the environment. The Department of Justice is committed to protecting the environment and to prosecuting persons who threaten the community through their illegal actions."

Wyman was convicted of the felony environmental crime on April 5, 2011, by a federal jury following a five-day trial. In addition to convicting Wyman of violating the federal Resource Conservation and Recovery Act (RCRA), the jury made a special finding that the defendant's conduct knowingly placed another person in imminent danger of death or serious bodily injury.

Wyman was also ordered to pay \$800,000 to the United States Environmental Protection Agency's Region 9 Emergency Response Office for costs associated with a 47-day clean-up. During the clean-up, EPA contractors were forced to call out the Los Angeles Police Department Bomb and Arson Squad seven times to deal with possible explosives mixed into the burned debris.

Wyman was charged in June 2009, after firefighters responded to a report of a fire and explosions at Wyman's residence. Because of the ammunition that was being "cooked off" in the fire, firefighters had to wear bullet proof vests. Investigators at the scene discovered a large cache of toxic materials, including thousands of rounds of corroded ammunition, highly reactive lead-contaminated waste from shooting ranges, hundreds of pounds of decades-old gunpowder and military M6 cannon powder, and industrial solvents that contained 1,1,1-trichloroethane and tetrachloroethylene, two potent chemicals that are listed as hazardous substances under federal law. Wyman did not have a permit to store any of the materials.

The case was investigated by the United States Environmental Protection Agency and the Federal Bureau of Investigation.

June 13, 2005 is the first day that the Primary Copper Smelter MACT was effective.  
Here is a website (and the language) that may help put things into context :  
<http://www.epa.gov/compliance/civil/caa/caaenfprog.html#stationary>

## MACT Air Toxics Enforcement

Section 112 of the Clean Air Act was amended in 1990 to require EPA to issue emission standards and requirements for 189 toxic air pollutants to curb the emission of cancer causing air toxins. This was a massive undertaking, which has resulted in over 100 new rules for industrial and commercial sources of air pollution, from neighborhood dry cleaners to petrochemical complexes. These new rules, called NESHAPs or National Emissions Standards for Hazardous Air Pollutants, apply mostly to larger sources, but also some smaller sources of air pollution. The rules require existing and new sources to install controls that are the Maximum Achievable Control Technology or MACT and install certain monitors, keep records and report to the agency that is overseeing them.

For the first several years that these new rules were in place, EPA mostly conducted outreach and compliance assistance to the regulated community, but now has begun a standard enforcement process of identifying priority violators and taking enforcement actions, including seeking penalties. Since 1997, EPA has brought enforcement actions for Section 112 air toxics violations in over 500 administrative penalty cases and nearly 100 judicial enforcement cases, some involving penalties and environmental projects over \$1 million each.

In December 2008 the [Circuit Court of Appeals for the District of Columbia \(PDF\)](#) (21 pp, 65K), issued a decision vacating the provisions in 40 C.F.R.

Sections 63.6(f)(1) and 63.6(h)(1), which exempt emissions that occur during periods of [startup, shutdown and malfunction](#) from the emission standards that must otherwise be met for a given hazardous air pollutant. Certain parties to that litigation have sought a rehearing of the Court's decision. If the Court denies the request for a rehearing and issues a mandate requiring the vacatur of these rules, then sources will have to meet applicable emission standards even during periods of startup, shutdown, and malfunction.

### GreenFinanceSF for Commercial Property Owners Launches

As part of San Francisco's effort to drive environmental and economic innovation, Mayor Ed Lee and Director Melanie Nutter launched a groundbreaking program to encourage businesses to undertake climate-friendly building improvements and attract significant new capital to pay for them.

The GreenFinanceSF Commercial program is a Property Assessed Clean Energy (PACE) program designed to give commercial property owners a new form of financing for the installation of energy efficiency, renewable energy, and water conservation improvements.

San Francisco's 16,000+ commercial buildings account for half of citywide energy use and 27% of the city's carbon footprint. The program strives to help commercial property owners reduce operating costs, improve occupant health and comfort,

We want to hear your ideas. Use [InSight](#) to: submit, vote, and explore ideas that make SF better.

Flickr

enhance building value, and mitigate environmental impact as well as to provide financial institutions with very secure collateral to facilitate project financing at attractive rates.

"The commercial PACE program is the next big step forward in San Francisco's efforts to dramatically reduce energy use and carbon emissions," declared San Francisco Mayor Ed Lee. "We are excited about the potential to unlock an enormous amount of private investment - from a wide range of sources - and create thousands of local construction jobs."

GreenFinanceSF will accept financing proposals from property owners on a rolling basis with the expectation that all qualified applications will be approved. For more information on GreenFinanceSF or to apply, please visit [www.GreenFinanceSF.org](http://www.GreenFinanceSF.org). If you have specific questions, feel free to send an email to [contact@greenfinancesf.org](mailto:contact@greenfinancesf.org), or call 415-937-7223.

## Dreaming of a Green Christmas

Living, potted "Green Christmas Trees" are now available for only \$75 from the SF Department of the Environment and Friends of the Urban Forest!

Make all of your holiday dreams come true with Dreaming of a Green Christmas!

These beautiful and unconventional trees are an environmentally friendly alternative for your holiday celebration. Cut Christmas trees (organic and conventional) aren't able to provide ongoing environmental benefits. Typical potted Christmas trees are a good choice if you have a place to plant them after the holiday season. Unfortunately, most

people who live in the City don't, since these trees grow quite large and usually can't fit into a typical San Franciscan yard. Synthetic trees are usually made out of PVC (very bad for the environment) and most are manufactured and shipped from across the world.

Our Dreaming of a Green Christmas trees are popular trees that are always planted in FUF's community tree planting programs. All of these trees will become San Francisco street trees, providing long-term environmental, social, aesthetic, and economic benefits to our city's residents.

These trees sell out fast, so order your tree soon! Then, come pick out your favorite tree, take it home and decorate it. After the holidays, return it so we can plant it on a city street!

For more information about our Dreaming of a Green Christmas program and to order your tree, visit our website: [sfenvironment.org/greenchristmas](http://sfenvironment.org/greenchristmas).

---

## Take Part in a Citywide Discussion Around Sustainability at [Ideas4SF.org](http://Ideas4SF.org)!

Jonathan's Idea4SF: "Make compost bins bigger!"

The SF Community InSight campaign now has 1,740 ideas4SF! If you haven't already posted an idea to our online forum at [www.ideas4sf.org](http://www.ideas4sf.org) and voted for your top ideas, we encourage you to take a moment to sign up and help us reach 2,000 ideas by 2012!

### Current Top Ideas:

- 1) More Car-Free Zones
- 2) Better Public Transportation
- 3) More Bike Lanes

In the last month, the SF Community InSight team began working with a group of SF State Environmental Studies Senior Seminar students on InSight. Working together to collect hundreds of ideas from the SF State campus, our team of students have been an incredible addition to our team in helping us gather both offline and online support for the project.

Now it's your turn to join hundreds of San Franciscans and take part in the Department of the Environment's Community InSight Campaign by sharing your ideas of how to make San Francisco a greener and healthier place to live at [www.ideas4SF.org](http://www.ideas4SF.org)!

By joining the discussion, posting one idea and voting on your favorite ideas, you will help to make San Francisco the most sustainable city in the world!

---

## Environment Now! SF Residents Helping SF Residents Go Green

Jacob from Environment Now  
doing residential outreach in the  
Sunset District.

The SF Department of the Environment's Environment Now team has just completed an extensive door-to-door outreach campaign in the Sunset District and is now shifting gears to the Bernal Heights and Visitacion Valley neighborhoods. Residents of these neighborhoods can be on the lookout for friendly Environment Now staff to answer questions on composting, recycling and household hazardous waste removal. The outreach team has resources such as kitchen compost bins to help households move closer to Zero Waste!

The Environment Now program is a green jobs training program designed to support eco-literacy and skills development of the trainees while promoting environmental education and outreach programs throughout the city. We are proud to announce that the program recently graduated two associates, Lee Williams and Jayson Edwards. We wish them well on their next endeavors!

---

## California Takes Action on Bisphenol-A (BPA)

Plastic bottles may be unsafe,  
no matter what the label says.

Bisphenol-A, or BPA, is in the news again. BPA is a chemical additive used in consumer products ranging from product labels, dental sealants to electrical equipment and children's products. BPA is widely used to harden certain plastic containers, to resist corrosion in aluminum food cans, and to coat paper receipts. It has been linked to diabetes, cardiovascular disease, breast cancer, and been shown to mimic estrogen in our bodies. In one study, the CDC found BPA present in the urine of 93% of tested adults.

The SF Department of the Environment has been following the widespread use of this chemical for years. In fact, in 2008, San Francisco adopted a resolution urging local retailers to voluntarily discontinue the sale of infant bottles and sippy cups containing BPA. Since then, several local and state governments have introduced legislation to restrict BPA in consumer products starting with children's products. With the passage of the Toxin-Free Infant and Toddlers Act (AB1319) which bans the use of BPA in baby bottles and sippy cups, California joined the list of States that have taken action on this issue.

Thanks to the continued public demand for safer products, California's vulnerable populations will no longer be exposed to BPA through plastic food containers. While this is a great first step, BPA continues to be used in dozens of other products, which means that exposure from other sources will continue. San Francisco will continue to support legislation calling for safer alternatives to be used in products. In the meantime, you can reduce your exposure by choosing BPA free products and signal the manufacturers to provide safer alternatives to consumers.

Subject Re: Mexicali Slaughterhouse Outfall

Tomas,

Conagua (CNA) is the federal water permitting authority but the team is uncertain if in Baja - CEA or DEG (state agency) the inspection and enforcement authority is delegated to the state. We should consider sharing with IBWC/CILA. We will have to manage situation (Looks like I'm not be the only one in R9 to create an international incident with IBWC/CILA). Please keep us in the loop as this will have ramifications for the entire border community. I expect this will find its way on the BECCNET shortly.

Thanks Tomas!

Tomas -

Can you or Doug contact PROFEPA and send them the footage and the location that it was shot and ask them to follow-up. Also, let them know that I will be posting on Monday.

Tomas,

Conagua (CNA) is the federal water permitting authority but the team is uncertain if in Baja - CEA or DEG (state agency) the inspection and enforcement authority is delegated to the state. We should consider sharing with IBWC/CILA. We will have to manage situation (Looks like I'm not be the only one in R9 to create an international incident with IBWC/CILA). Please keep us in the loop as this will have ramifications for the entire border community. I expect this will find its way on the BECCNET shortly.

Thanks Tomas!

I let Tomas know he may want to contact CNA but uncertain which agency in Baja has the lead for inspection and enforcement if any. Also suggested he contact IBWC/CILA unless we want to do it. Looks like I'm not the only one to create and international incident. Good Friday news, can't wait to see if this makes it to the BECCnet.

Subject Fw: Mexicali Slaughterhouse Outfall

Keith,

You offered at one time to translate JB's direction. Please do so now as I believe I've just been admonished.

Background:

IBWC (International Boundary and Water Commission) and the CILA (Mexican counterpart) are the federal agencies responsible for maintaining the US-Mx Boundary and water quality matters. We have worked with them for years and we keep them in the loop on all of our border water infrastructure and Border 2012 work. At best our relationship with IBWC has been an uneven partnership.

Tuesday afternoon, when IBWC/CILA heard the RA was going to observe the slaughter house discharges, they asked us not to take him there but rather, at some later date, meet with them to discuss the matter.

Doug and Tomas informed Jared of IBWC/CILA's request and he decides to see the discharge (which is along side a public road) despite the request of IBWC/CILA..

Now Jared want Tomas to inform appropriate officials **and** once done, he will post his video of the discharge on Monday. Once Jared posts the video Monday - it will find its way to the BECCnet a border wide website managed by the BECC but any one can post an article, notice etc on the site.

This morning, I suggest to Tomas who the appropriate federal and state authorities are who have regulatory authority regarding the discharge (permitting, inspection and enforcement). I also alert Tomas that once this is posted by EPA, it will find its way to the BECCnet. And once posted by Jared, IBWC and CILA will assert that R9 is creating yet another international incident. I have been accused of that simply by writing a letter to the Mexicali w-ww utility gently reminding them to notify their US partners (RWQCB and EPA) if a spill occurs in the New River from their facility.

Perhaps my tone too flip in my email?

In any case Enrique will try to speak with Jared today about Jared's intention of posting his video on Monday.

I let Tomas know we have no authority here, and while Mexico federal and state have authority, they have never used it for this situation as this discharge has continued for decades. The bi-national technical team used to visit the discharge location several times a year to urge Mexico to try to stop the unauthorized discharge...to no avail.

Thanks for your help/interpretation/intervention.

Now Jared want Tomas to inform appropriate officials **and** once done, he will post his video of the discharge on Monday. Once Jared posts the video Monday - it will find its way to the BECCnet a border wide website managed by the BECC but any one can post an article, notice etc on the site.

This morning, I suggest to Tomas who the appropriate federal and state authorities are who have regulatory authority regarding the discharge (permitting, inspection and enforcement). I also alert Tomas

that once this is posted by EPA, it will find its way to the BECCnet. And once posted by Jared, IBWC and CILA will assert that R9 is creating yet another international incident. I have been accused of that simply by writing a letter to the Mexicali w-ww utility gently reminding them to notify their US partners (RWQCB and EPA) if a spill occurs in the New River from their facility.

Perhaps my tone too flip in my email?

In any case Enrique will try to speak with Jared today about Jared's intention of posting his video on Monday.

I let Tomas know we have no authority here, and while Mexico federal and state have authority, they have never used it for this situation as this discharge has continued for decades. The bi-national technical team used to visit the discharge location several times a year to urge Mexico to try to stop the unauthorized discharge...to no avail.

Thanks for your help/interpretation/intervention.

Subject Re: Mexicali Slaughterhouse Outfall

JB went to see the slaughterhouse discharges even when IBWC/CILA asked him not to. While there, JB took videos and threatened to post them once the appropriate Mx officials were notified. I, inappropriately, let him know he would be accused by IBWC./CILA of creating an international incident. Enrique M has convinced him to not post his recent video until everyone is notified rather than this coming Monday.

Keith,

You offered at one time to translate JB's direction. Please do so now as I believe I've just been admonished.

Background:

IBWC (International Boundary and Water Commission) and the CILA (Mexican counterpart) are the federal agencies responsible for maintaining the US-Mx Boundary and water quality matters. We have worked with them for years and we keep them in the loop on all of our border water infrastructure and Border 2012 work. At best our relationship with IBWC has been an uneven partnership.

Tuesday afternoon, when IBWC/CILA heard the RA was going to observe the slaughter house discharges, they asked us not to take him there but rather, at some later date, meet with them to discuss the matter.

Doug and Tomas informed Jared of IBWC.CILA's request and he decides to see the discharge (which is

along side a public road) despite the request of IBWC/CILA..

Now Jared want Tomas to inform appropriate officials **and** once done, he will post his video of the discharge on Monday. Once Jared posts the video Monday - it will find its way to the BECCnet a border wide website managed by the BECC but any one can post an article, notice etc on the site.

This morning, I suggest to Tomas who the appropriate federal and state authorities are who have regulatory authority regarding the discharge (permitting, inspection and enforcement). I also alert Tomas that once this is posted by EPA, it will find its way to the BECCnet. And once posted by Jared, IBWC and CILA will assert that R9 is creating yet another international incident. Subject Re: Fw: Mexicali Slaughterhouse Outfall + Guam update

Thanks for your guidance and will do so in the future. And just to be on the safe side - I will NEVER send Jared an unsolicited email again.

On Guam matters, good news for WTR division Guam efforts - EAB has denied GWA's appeals of the region's decision to deny waivers from secondary treatment for both the Northern District WWTP & Agana WWTP.

So in the past 3 weeks, WTR has prevailed on two regulatory actions - the Judge issuing an Order that supports EPA recommendation for water and wastewater projects and schedule, and we have prevailed in denying GWA's request for their waiver from secondary treatment for their two largest wastewater treatment plants.

**FOR IMMEDIATE RELEASE**

November 23, 2011

## Tips for Environmentally Friendly Gifts this Holiday Season

**WASHINGTON** – The U.S. Environmental Protection Agency (EPA) is offering holiday gift-giving tips that will help support a healthy environment this season and all year long. Energy Star, Design for the Environment, and WaterSense labels can be found on thousands of products across the country, making it easy to choose gifts that can help anyone on your list save energy and protect the environment. By using these products this holiday season, consumers can cut their energy bills and harmful pollution while helping keep our environment healthy.

### Look for the Label that Saves Gift Recipients Money

**Energy Star Home Entertainment:** You can find the Energy Star label on nearly all entertainment products from TVs and Blu-ray disc players to home-theaters-in-a-box. If you are in the market for a digital picture frame, consider one that has earned the Energy Star. It uses 25 percent less energy than non-qualified models.

**Energy Star Office Products:** Shoppers can also find the Energy Star label on office products such as computers, LCD monitors, notebooks, multifunction printers and more. A home office fully equipped with Energy Star qualified products can save up to \$380 over the lifetime of the products. Energy Star qualified computers and monitors were created with a power management sleep mode to ensure you are saving energy (and money on utility bills) when the product is not in use.

**Energy Star Qualified Battery Chargers for your Favorite Product:** Products that use Energy Star qualified battery chargers, such as video game controls, digital cameras, shavers, hand vacuums, power tools, and cordless lawn mowers, use 35 percent less energy compared to conventional chargers. Old battery chargers can be recycled

through many manufacturers and retailers that have electronics recycling programs nationwide.

**Healthier Homes 'Design for the Environment' Label:** From pet care products to dish soaps to supplies for a car, consumers should look for the Design for the Environment (DfE) label to quickly identify and choose products that are safer for families and also help protect the environment. In 2010, Americans using products with the DfE label cut the use of harmful chemicals by more than 600 million pounds.

### **Festive and Healthy Holiday Tips for People and the Planet**

**Holiday Decorating:** Look for the Energy Star label on LED decorative light strings to meet your holiday decorating needs. Qualified light strings use about 70 percent less electricity than incandescent light strings and are available in a variety of colors, shapes, and lengths. These Energy Star qualified light strings save energy and are more durable, shock-resistant and cooler to the touch.

**New Electronic Gift? Recycle the Old One:** Encourage gift recipients to reuse or recycle their old electronics, allowing the valuable materials within to be used again in new products while helping to save natural resources. Check out EPA's Plug-In To eCycling initiative for more information on how to safely recycle electronics, including cell phones, computers, and TVs.

**Reusable Bags:** Millions of paper and plastic bags end up in the landfills every year. Skip the extra bags and bring reusable cloth bags when shopping-- they're environmentally friendly and cost efficient.

**Skip the Excess Wrapping:** Try wrapping gifts in recycled paper bags, recycled wrapping paper, or give gifts that don't require excess packaging to keep more trash out of landfills.

**Have a Water Efficient H2Oidday:** Preparing for and cleaning up after a holiday meal often requires more water use than usual. Running your tap continuously while preparing food or washing dishes wastes water and can use more than two gallons of water every minute your tap is running. EPA's WaterSense program provides useful tips and over 4,000 products have earned the WaterSense label to save water, energy and money. If every American household reduced their water use by 10 gallons on just Thanksgiving Day, it would save more than 1 billion gallons of water.

Subject Drift

Enrique -

Areas that need work -

1: The issues around public participation should be secondary to the substance. There may be reasons the Agency has decided not to go back out for public comment and I don't want that to trump our key issues. Therefore, I would either shorten and move the language to the end or remove completely

2: More work needs to be done to explain why our new language is a compromise as opposed to no drift language.

3: There were some good examples of cases we couldn't bring under the new language e.g. the school bus case, that I would include

4: The issue about how the States have a "work-around" but that EPA needs jurisdiction too should also be included.

5: I would finally include a sentence about Angelita C's and how it highlights importance of protecting vulnerable communities.

Thanks, J

We're working on an attachment that describes cases we wouldn't be able to take under the hqs proposed harm language.

We'll shorten the section on public process and move it to the end. It was intended to propose a path forward no matter what hqs decided to do - proceed with their proposed "cause harm" language or proceed with our proposed compromise language.

We will shoot to getting something back to you tonight. We can work on any additional comments on friday.

Also, not clear if we're going to be able to turn this into a joint memo. I've shared with my peers but it may be logistically difficult because of leave schedules. But I haven't given up quite yet.

**Subject:** Racing To Zero

Dear Jared:

This is a quid quo pro deal!!!

Please read this through no matter how busy you are. This is so important to us all and there is still time to make a difference. We are doing so well on Kickstarter but need \$130. more to achieve our half way goal of \$4000. I have \$1000. coming in tonight and hope you can contribute a few dollars to bring us up to date.

As you know, for the last year I have been developing a film on a subject known to all but seldom taken to heart, GARBAGE. For example, why do we have to generate 4.4 pounds of garbage every day of our lives, where does it come from, where does it go, does it have another life? You bet it does and that's what we want to talk about.

As a result I am, like everyone else, combing the contact lists to find ever more names for our Kickstarter link. As you know this method of fundraising is based on high volume low donations. Please look at both that link and the web site as would like your opinion and your support. So press the button as fast as you can. Here is a brief description.

RACING TO ZERO is a feature length documentary which will inspire us to change our relationship to the garbage we create and examine solutions which will help to protect our environment. We want people to regard what they buy, consume and throw away in a new light, to see the positive side of garbage, to reconsider much of waste as a resource, and to understand that by changing current life styles, we can make a radical difference.

We will focus attention on the efforts of 3 cities on the West Coast who recognize the serious threat of garbage to the environment and the steps that they are taking to achieve zero waste to landfill in the foreseeable future. The film will show the existing process for collecting, sorting and transferring of garbage and then will investigate and document the collective efforts to diminish unrecycleables,

increase composting, change patterns of production and consumption, and thus radically reduce the amount of refuse sent to landfills.

Please join us in this race by pledging a donation, through Kickstarter, to help make RACING TO ZERO a reality. It really is a race as we have 54 days to make our goal of \$8000.00. We have no time to lose.

**Subject:** News Release: EPA gives nearly \$25,000 to Kokua Kalihi Valley Comprehensive  
Family Services for indoor air pollution education program

For Immediate Release: December 8, 2011

Contact: Dean Higuchi, 808-541-2711, [higuchi.dean@epa.gov](mailto:higuchi.dean@epa.gov)

EPA gives nearly \$25,000 to Kokua Kalihi Valley Comprehensive Family Services for indoor air pollution education program

HONOLULU – The U.S. Environmental Protection Agency recently awarded a \$24,974 grant to the Kokua Kalihi Valley Comprehensive Family Services for a community-wide campaign to mitigate the causes of indoor air pollution and reduce exposure to toxic cleaning chemicals at Kuhio Park Terrace in Honolulu.

“Community-based action and participation in environmental decision-making are critical to building healthy and sustainable communities,” said Lisa Garcia, EPA’s senior advisor to the administrator for environmental justice. “By supporting local environmental justice projects in under-served communities, we are expanding the conversation on environmentalism and advancing environmental justice in communities across the nation.”

Kokua Kaliha Valley Comprehensive Family Services will involve the community in a campaign to mitigate the causes of indoor air pollution, reduce exposure to toxic cleaning chemicals, and address public health issues resulting from poor sanitation within the Kuhio Park terrace public housing community. The project’s goal is to empower the predominantly Pacific Islander community of Kuhio Park Terrace by providing residents with necessary information and tools to take ownership of their physical surroundings and thereby improve the health of their families and community.

This year, EPA awarded more than \$1 million in grants to 46 non-profit and tribal organizations working to address environmental justice issues nationwide. EPA also announced it is seeking applicants for \$1 million in environmental justice small grants expected to be awarded in 2012. EPA’s environmental justice efforts aim to ensure equal environmental and health protections for all Americans, regardless of race or socioeconomic status. The grants enable non-profit organizations to conduct research, provide education,

and develop solutions to local health and environmental issues in communities overburdened by harmful pollution.

The 2012 grant solicitation is now open and will close on February 29, 2012. Applicants must be incorporated non-profits or tribal organizations working to educate, empower and enable their communities to understand and address local environmental and public health issues. EPA will host four pre-application teleconference calls on December 15, 2011, January 12, 2012, February 1, 2012 and February 15, 2012 to help applicants understand the requirements.

Environmental justice means the fair treatment and meaningful involvement of all people, regardless of race or income, in the environmental decision-making process. Since 1994, the environmental justice small grants program has provided more than \$23 million in funding to community-based nonprofit organizations and local governments working to address environmental justice issues in more than 1,200 communities. The grants represent EPA's commitment to expand the conversation on environmentalism and advance environmental justice in communities across the nation.

**ReplyTo:** "U.S. EPA" <usaepa@govdelivery.com>

**Subject:** EPA Awards Nearly \$100,000 in Environmental Justice Grants to California Projects

**For Immediate Release:** December 8, 2011

**Media Contact:** Nahal Mogharabi, [mogharabi.nahal@epa.gov](mailto:mogharabi.nahal@epa.gov)

**EPA Awards Nearly \$100,000 in Environmental Justice Grants to California Projects**  
*Organizations focus on environmental issues in Los Angeles, Central California*

**San Francisco** – The U.S. Environmental Protection Agency recently awarded \$99,988 in grants to organizations in Los Angeles, Riverside, Kettleman City, and the San Joaquin Valley for projects focused on reducing exposure of toxins, diesel education and drinking water improvements. The grants enable non-profit organizations to conduct research, provide education, and develop solutions to local health and environmental issues in communities overburdened by harmful pollution.

“Community-based action and participation in environmental decision-making are critical to building healthy and sustainable communities,” said Lisa Garcia, EPA’s senior advisor to the administrator for environmental justice. “By supporting local environmental justice projects in under-served communities, we are expanding the conversation on environmentalism and advancing environmental justice in communities across the nation.”

In 2011 the EPA awarded more than \$1 million in grants to 46 non-profit and tribal organizations working to address environmental justice issues nationwide. EPA’s environmental justice efforts aim to ensure equal environmental and health protections for all Americans, regardless of race or socioeconomic status. This year’s California grants include the following:

**Community Services Unlimited, Inc**

**Project:** Growing Healthy: Reducing Exposure to Toxins in our Community

**Grant Amount:** \$24,988

**Location:** South Central Los Angeles

*Growing Healthy: Reducing Exposure to Toxins in our Community* aims to teach youth in South Central Los Angeles about sustainable urban agriculture techniques, and engage them in teaching other youth and adults in the community about the benefits of adopting healthy eating habits, methods used to reduce exposure to toxins, and ways to mitigate climate change. Through teaching students how to grow food organically the project will increase community residents’ access to healthy fresh produce while also raising awareness about, and reducing exposure to lead and pesticide hazards.

**Center for Community Action & Environmental Justice**

**Project:** Engaging Schools in Addressing Indoor Air Pollution

**Grant Amount:** \$25,000

**Location:** Riverside and San Bernardino Counties

*Engaging Schools in Addressing Indoor Air Pollution* will educate students and teachers about the basis of indoor air quality and establishing ongoing reduction of asthma triggers in classrooms.

**Greenaction for Health and Environmental Justice**

**Project:** Kings County Diesel Education, Emission Reduction and Environmental Health

**Grant Amount:** \$25,000

**Location:** Kettleman City and Avenal Kings County, California

*Kings County Diesel Education, Emission Reduction and Environmental Health* aims to reduce diesel emissions impacting the air quality of Kettleman City and Avenal and create a replicable diesel education and emissions program model that can be spread to other San Joaquin Valley communities impacted by diesel pollution. Greenaction will conduct community outreach to educate stakeholders (including community members, businesses, truckers and trucking companies, schools, bus drivers and parents) on diesel issues impacting their community, implement behavior changes (complying with anti-idling laws), and encourage equipment changes that will lead to a reduction of emissions and improve residents' respiratory health. The project hopes to inform at least 1,000 residents, 75 drivers, 10-20 businesses and 3 school administrators about the diesel emissions issues impacting their community.

**Community Water Center**

**Project:** Protecting Groundwater from the Ground UP

**Grant Amount:** \$25,000

**Location:** San Joaquin Valley, CA (Tulare, Kern, Fresno, Kings, Madera, Merced, San Joaquin, and Stanislaus)

*Protecting Groundwater from the Ground Up project* aims to educate select disadvantaged rural communities in the San Joaquin Valley of California about the causes and effects of drinking water pollution in their communities, and empower affected residents to take specific actions to reduce and prevent contamination of the region's drinking water sources in the future. The project will provide technical assistance to residents facing water challenges, utilize various strategies to reach and educate residents about the pervasive lack of safe drinking water, provide water quality trainings to residents who want to become more engaged in San Joaquin Valley drinking water protection efforts, and facilitate the direct participation of residents in various types of public venues where water quality decisions are made.

EPA also announced it is seeking applicants for \$1 million in environmental justice small grants expected to be awarded in 2012. The 2012 grant solicitation will close on February 29, 2012.

Environmental justice means the fair treatment and meaningful involvement of all people, regardless of race or income, in the environmental decision-making process. Since 1994, the environmental justice small grants program has provided more than \$23 million in funding to community-based nonprofit organizations and local governments working to address environmental justice issues in more than 1,200 communities. The grants represent EPA's commitment to expand the conversation on environmentalism and advance environmental justice in communities across the nation.

Quality Improvements, Flood Damage Reduction, Northern California Salmon  
Restoration

**MEDIA ADVISORY**

**\*\*\*Press Conference and Tour\*\*\***

*Funding details to be announced Friday Dec. 9 during Press  
Conference  
along the Napa River in Rutherford*

**For Immediate Release: Dec. 6, 2011**

**Media Contacts:** Mary Simms (415) 947-4270, simms.mary@epa.gov or  
Rick Thomasser (707) 259-8657, richard.thomasser@countyofnapa.org

**U.S. EPA, Napa County Announce Millions for Water Quality  
Improvements,  
Flood Damage Reduction, Northern California Salmon  
Restoration**

*Habitat restoration supports recovery of Central Coast steelhead  
trout, Chinook salmon and an extensive assemblage of native fish  
species*

**WHAT:** The press conference will announce the details of an EPA grant  
as well as local and state funding to restore water quality,  
riparian and aquatic habitat in the Napa River watershed.  
Highlights include a pioneering private-public partnership  
designed to improve water quality and salmon habitat and  
address eroding streambanks within this important agricultural  
area.

The event will bring together landowners, local elected officials and partner agencies to celebrate restoration accomplishments and highlight recent funding. \$22 million in federal funding has been appropriated since 2008 for San Francisco Bay, currently supporting 38 projects, with 53 organizations leveraging and matching more than \$42 million.

**WHO:** U.S. EPA Regional Administrator Jared Blumenfeld, U.S. Congressman Mike Thompson, and Napa County Supervisor Diane Dillon will be joined by key federal, state and local officials to provide details of this exciting project.

**WHEN:** **Friday, Dec. 9, 2011**  
**11:30 a.m. Press Conference followed by walking tour of restoration area**

**WHERE:** **Napa River (Enter at Honig Winery) Directions:** Enter the driveway to the Honig Winery / Round Pond Estate at 850 Rutherford Cross Road (Highway 128 between St. Helena Highway 29 and the Silverado Trail). Pass the olive mill and turn left down the vineyard avenue at the brown house before reaching the Honig Winery tasting room parking lot. Proceed to the end and park along the vineyard avenue near the Napa River. Follow the signs and exit to the left along the river berm road out through the metal fence opening at 900 Rutherford Cross Road.

**Please note: As we will be walking along the banks of the Napa River, outdoor footwear is recommended.**

**RSVP: Accredited members of the media.** To RSVP for the press conference and visual tour of the restoration area, please send an email to Mary Simms at [simms.mary@epa.gov](mailto:simms.mary@epa.gov). Please include your name, media affiliation and contact information in your request.

Subject: early lunch friday?

---

Jared

Happy new year. You in town Friday? I have a solar industry strategy mtg at 1 downtown. Any chance you could meet for an early lunch? 11:30?

Just met with the governor on our solar agenda for 2012 and would like to check in with you on that and other stuff.

Onwards,

David

Subject Speaking request: February 1st in SF

Hi Jared,

As you might know, I'm involved in a local group called Full Circle Fund, an engaged philanthropy organization made up of business, non-profit and government leaders. The organization is hosting the kick off event to their next grant cycle and we thought you'd be a great speaker to address what's hot in the environmental field and get people jazzed about identifying and funding a local environmental group on a key issue. The save the date and the draft schedule/overview is attached.

Please let me know if you might be available/interested.

Also, I'd love to grab coffee or lunch with you in the coming weeks. Let me know if you've got some time.

Hope you and your family had a great holiday!

Cheers,

Melanie

P.S. - one of your staff, Trina Martynowicz is also a member and is happy to answer any questions you may have about the org or event as well.

Dear Friends,

**On Wednesday, February 1, we're bringing all circles together to kick off the new year.** At this not-to-be-missed evening, we'll share all the exciting details about our new unified grant cycle. Plus, you'll learn about hot button issues in our three issue areas, and hear best practices from experts to enhance our grant-making in the new year.

There will (of course) be food, drinks, and the opportunity to get to know members across circles. Stay tuned for more information! RSVP link coming soon.

**In other news, the Holiday Party was a great time!** Members relaxed at the massage stations, and Hamilton Family Center's Adopt A Family program greatly appreciated all your generous donations. Check out [more pictures here](#).
